INSPIRED.

The OBEX® brand of products offers highly effective, comprehensive modular entry solutions designed as a three zone barrier system to prevent dirt and moisture from entering the building.

Available in coordinated colors and patterns, OBEX® entry products are engineered to increase the functionality of a building's entrance without forsaking elements of design or aesthetic. Simple and easy to work with, OBEX® offers entry systems that can be recessed or surface-mounted as well as exterior and interior applications.

Sepio is a modular entry tile system that creates a beautiful first impression in a space that must also deal with an active world and create a barrier against the elements.

Manufactured with a dual-fiber ECONYL® nylon yarn construction that provides high performance when it comes to catching dirt and moisture. Sepio is designed to be an interior walk-off solution in zones 2 or 3.

Sepio offers two popular designs, Rampart and Aegis, available in four colorations to create the perfect balance of design and function.

OBEX® ZONE ENTRY SYSTEM

ZONE 1

OUTDOORS: The area just before the building access—ideal for placing a product with scraping action to remove grit and heavy dirt particles such as sand and snow.

Milliken Product Solutions: Prior™ and Tergo™

ZONE 2

INDOORS: The primary area just inside the building where a product with dual action—scraping and absorbing—should be installed to defend against dirt and moisture. This area often features a recessed matwell.

Milliken Product Solutions: Tergo™, Forma™ 2.0, Quadrus Brush, and Sepio

ZONE 3

INDOORS: Secondary area inside the building after Zone 2. A textile product for moisture absorption is the preferred choice. Also applicable to circulation areas other than entrances.

Milliken Product Solutions: Quadrus, Quadrus Brush, and Sepio
