SHADE VARIATION GUIDE

Just as texture and physical appearance will vary in samples of wood, beautiful variations of shade are found in this unique LVT product. The shade variation guide reflects our LVT styles ranging from low, to moderate, to high. Low shade variation features soft and subtle gradations. Moderate shade variation contains a more distinguishable variety of hue. And high shade variation models the highest level of contrast. The patterns in **FORTIFIED FOUNDATIONS** have **varying** shade variation as noted throughout the brochure.
