Milliken®

UNEARTHED

MILLIKEN FLOORING

INSPIRED. INSPIRING.

Whether unearthed in archaeological digs or happened upon by chance, fossilized remains and mineral formations reveal the intricacies of nature. The beauty discovered in the materiality of these natural elements inspires new texture, color, and definition. We unveil them in second surfaces exclusively through the lens of technology.

Through every archaeological site, we uncover new insight into the world as it once was: ancient civilizations, storied cultures, and wild terrains ruled by prehistoric life.

A new world reveals itself. Shades of sediment and clay cue the passing of time and present a moment of self-reflection. While we rush in our fast-paced society, Mother Nature takes her time to evolve the physical environment, preserving markers from the past to reveal her true nature in the present.

At once reflective and progressive, the Unearthed Collection brings to light the stories told through line and figures in cave paintings, ceramic treasures and ornate architecture that once defined history's great cities. From each of which we glean lessons learned and marvel at the ingenuity of the human spirit that has led us to become the diverse culture of innovators we are today.

The world is waiting to be unearthed. What stories will you let it tell?

TEXTURE THROUGH LAYERS

The Unearthed Collection interprets the textural transformations that take place within every inch of the earth. Horizontal strata of sedimentary rock build upon one another, each individual line and color a clue into the time when it was visible to the sun. Fine-grained mud stone and shale transport us back to Late Jurassic times, when prehistoric ammonites left their large spirals forever impressed.

The collection's 20 patterns are an organic exploration of shape and color, which evolve into new textures as nature's intriguing effects move underlying surfaces forward. Such precisely nuanced quality of color and pattern can only be achieved through the industry's most revered digital dye injection print technology. The resulting aesthetic is both subtle and stimulating.

Bedrock 2, Caldera & Caldera Fossil in Larimar

TEXTURE EVOLVED

Unearthed creates a new approach to integrate layered texture into interiors. A robust offering of 20 coordinating patterns provides various design elements: granular textures, linear striations, and both angular and organic, free-form shapes.

For more linear characteristics, consider Mantle, Shale, and their coordinating counterparts. Or, explore the boundless kaleidoscope qualities of Mélange and Gypsum.

Select patterns build upon base designs with a playful twist. The geometric additions of Glyph, Fossil and Spiro reveal excavated finds for a refined element of intrigue while Strata overlays an organic linearity. Gypsum Glyph, Caldera Fossil, Bedrock Spiro, and Mélange Strata are a few of our favorite examples.

Rock cairn in the Carpathians, Ukraine

LARIMAR

We bring our study of the earth's past into the future with Larimar, the collection's signature colorway. A base of inky blues, which we consider to be a new neutral, links the colorway across varying contrast levels as warmer tones create breathing room on the floor.

Select Larimar for interior environments that require a striking sophistication but also appreciate the eccentric.

Mélange in Larimar with Heritage Wood LVT in HER218

CREATIVE GUESTROOMS

Reimagine what guestrooms can be using Unearthed as the foundation of your design. The collection's modularity invites the use of multiple patterns of soft and hard surfaces to create inset area rugs, much like one's home.

Take advantage of the flexibility that modular carpet affords by strategically inserting additional tiles under guest beds. Simply swap tiles when replacement is required and your guest room stays in commission even amid repairs.

JASPER

From Neolithic cave painters to French royalty, red has been considered a color of magic, strength, and power for centuries. The rich reds, vibrant oranges and striking yellows of Jasper inject movement and energy into interiors. Mélange Strata resembles eroded red rocks whipped by water and sand over time, while Gypsum Glyph takes guests to the famed caves of Lascaux.

Gypsum Glyph & Bedrock 3 in Jasper

Bedrock 3 Fossil & Mélange in Jasper

COLOR COORDINATION

Each design is available in three rich and earthy colorways — Larimar, Jasper, and Quartz. Pair patterns in different design groupings using the same colorway for coordination or a custom coloration to achieve the design vision.

Caldera Fossil & Bedrock 4 Fossil in Jasper

Caldera Fossil & Bedrock 4 Fossil in Jasper

Caldera Fossil & Bedrock 4 in Jasper

PATTERN GROUPINGS

Strategic pattern groupings are easy to approach with the versatility of Uearthed. Five coordinated groups of various design and pattern character include Gypsum, Shale, Mantle, Mélange, and Caldera.

Each grouping features four individual patterns: an expansive hero design, a smaller-scale companion, and the same two patterns layered with geometrics. Work within a single group for projects with limited time lines, or explore the uniqueness created when multiple groupings are mixed.

Caldera Fossil in Jasper with Polished Concrete LVT in POL144

Mayan ruins in Tikal, Guatemala

QUARTZ

The most quiet colorway for Uneathed, Quartz offers a fresh sense of composure. Opaque browns and translucent beige tones are used to carve out patterns and communicate the unique characteristics of each design.

Mantle Spiro in Quartz with Polished Concrete LVT in POL55

Bedrock 7 Spiro & Mantle Spiro in Quartz

Shale & Bedrock 5 in Quartz

Mélange Strata in Quartz

CONFERENCE

Define large spaces easily with Uearthed. One of the unique features of the collection is our extra-large patterns. Design runners and rugs in various sizes, or work with our design and visualization teams to create a custom layout for your large space. Custom minimums apply.

Gypsum & Basin 5 in Quartz

MEETING

All board rooms are not created equal. Add sophistication, subtlety, or energy by choosing one of the many transition patterns for executive areas.

Mélange in Quartz with Heritage Wood LVT in HER208

OFFICE

Build distinctive workspaces with the modular components of Uearthed. Add border effects and gradients to zone particular areas, such as corridors or desk groupings, while also connecting people working in the space.

Shale Fossil in Quartz

Basin 6 Strata & Basin 6 in Quartz

MILLIKEN'S GRADIENT PROCESS

With over 30 colors in each design, Unearthed demonstrates the creative power of Millitron®, Milliken's proprietary digital dye injection technologies. Using only 12 colors, the Millitron gradient process strategically mixes and places color, shaping both precise and nuanced patterns.

Our Millitron® brand of advanced digital dye injection technologies enables us to create an immeasurable amount of subtle variants of color. We're defining how pattern on the floor plane is created by color.

You provide the color direction.

Milliken creates the color spectrum.

Colors merge to create an enhanced image.

CUSTOM COLOR PROCESS

Due to the gradient process, custom recoloring is not replaced color-for-color as traditionally done with most carpet technologies. Think of the carpet design as a photographic image which allows for color shifting or tinting. When recoloring the patterns in Unearthed, choose from our standard color choices of Larimar, Jasper & Quartz or provide us with color direction for your custom gradient.

In order to create a custom color, select two new mid tones from the Pure Color Library. The Milliken Design team will then build the color spectrum by adding lighter and darker tones allowing us to achieve the best possible gradient of color. Using this new gradient, the design is recreated in the new enhanced color palette.

Because of the nature of this process, custom coloring needs to be planned in your project time line like custom design work. The end result is worth the extra time as ultimately each design is unique art for your specific project.

INCODE

Elaborate large scale designs created with multiple unique tiles may seem overwhelming and a perceived installation challenge. However, Milliken's Incode is a unique technology that achieves large scale designs with an easy install process that benefits installers, specifying designers, and end-users.

STEP 1

INCODE PROCESS

STEP 1 — Milliken creates an installation map and SKU coding for each custom tile design.

STEP 2 — While each tile is being manufactured, the unique code is dye injected into the carpet face using a temporary, UV sensitive dye.

STEP 3 — Once the code is revealed with a UV light, the installation becomes as simple as 'install by numbers'.

STEP 3

Complete Flooring Solutions

With an industry leading selection of high-performance broadloom, modular carpet, and LVT options, we are inspired to create exceptional hospitality flooring products that will inspire you and your guest.

Whether a custom option from our easy to specify Millitron® patterning technology or a solution dyed nylon carpet tile for a refresh, we have the right color, pattern, and construction that adds value to your property. From the front door, through the lobby to the ballroom and guest room, Milliken brings innovative design to every corner of your property.

Broadloom Carpet

Modular Carpet Tile

Solution Dyed Nylon Guest Rooms Carpet Tile

Luxury Vinyl Tile

Hospitality Broadloom & Modular Carpet

Milliken's broadloom and carpet tile constructions incorporate the latest innovations in tufting and dyeing technology, achieving desired aesthetics and excellent performance. With our virtually unlimited color capability and easy to use custom design systems, creating inspiring carpets that achieve brand standards is easy. Our Color Reference system makes coordinating multiple products across a single project a snap; whether it's carpet, LVT, or entry systems. All modular carpet tile products have industry leading cushion backing that offers an extended lifespan, ergonomic and environmental benefits as well as requiring no moisture testing above grade or on new slabs. Broadloom carpet also has cushion-back options, and all are standard with StainSmart®, a proprietary treatment applied to Milliken carpets to protect against stains and enhance soil release.

Luxury Vinyl Tile

From natural looks of wood and stone to more modern textures and abstracts, Milliken's collection of Luxury Vinyl Tile flooring creates new options for the hospitality interior. With industry leading wear-ratings and a variety of installation options, our LVT collection brings new and inspiring options for resilient flooring. Our simple-to-search Color Reference system provides easy coordination of the LVT options to modular and broadloom carpets. From carpet tile to broadloom to planks to LVT, Milliken provides durable and elegant options for your project.

Guest Rooms Modular Carpet

Whether digitally patterned or solution dyed nylon, our guest room carpet options solve many of the design, installation, and maintenance concerns of property owners. From creating new guest room updates and meeting brand standards with ease, to lowering both maintenance and installation costs, our guest room carpet offering creates a difference for your property. With a variety of constructions, colors and patterns, Milliken has the right guest room carpet for your next project.

Trusted Performance

Milliken's hospitality flooring products provide peace of mind. With an industry leading 14 lifetime warranties, our flooring solutions bring value to the property each and every day. Industry-leading technologies, such as our ComfortPlus® cushion backing systems, help to create a more comfortable, quiet, and durable interior. Combine the expansive product options with our commitment to service and project coordination to see how Milliken can be your trusted partner to be sure each flooring decision is the best for your project.

Milliken™

FEATURES & SPECIFICATIONS

FACE WEIGHT — With carpet tile, some manufacturers quote total weight and some quote face weight. Milliken reveals both. Unearthed is available in 36oz and 40oz face weight.

BACKING — Various backing types are available with different tile options. All Milliken tile comes standard with attached PVC-free polyurethane cushion. Milliken broadloom has Endura-Loc™ High Performance Backing with woven latex secondary. Attached pad is an upgrade option.

DIMENSIONAL STABILITY — For carpet tile, it is imperative that the tile remain flat and dimensionally stable and secure to the floor under extreme conditions (humidity, temperature, & rolling traction). All Milliken modular carpet products are certified with the Aachen test and pass for dimensional stability.

STAIN AND SOIL PROTECTION — Food and beverage spills in public environments require product performance enhancements to help with long term cleanability and overall appearance. All Milliken carpet products include as standard our StainSmart® technology- a chemically bonded stain and soil resist technology.

MOISTURE BARRIER — For added performance, tile is standard with a barrier layer that prevents moisture from penetrating through the backing. Upgradeable option on broadloom.
