IMMIX

Milliken™

**INSPIRED. INSPIRING.**

*Our journey as humans has become intrinsically linked to technology. Whether chaotic or perfectly arranged, the patterns of our life are a blend of natural and man-made influences. We respond with a need for unity and harmony as our individual and collective needs morph with new definitions of engagement and purpose.*

**Vertex** in Dark with Green

## IMMIX

Every day, we are seeing and experiencing an increasingly blurred line between nature, people and technology. The result is a convergence between the real and the virtual, the haptic and the emotional, and the past and the present.

This form emerges with an aesthetic that is both timeless and modern offering a balance between maximalism and minimalism. A geometric splicing of different colors and materials creates dynamic forms that provide a sense of structure for the floor that yields both familiarity and comfort.

We explore form and composition with an understanding of scale as presented through strong geometry or in dichotomy with sweeping lines and curves.

Immix creates a new approach to integrate layered texture into interiors. A robust offering of 29 coordinating patterns provides various design elements: granular textures, linear striations, and both angular and organic, free-form shapes.

Vertex in Dark

## VERTEX

Two pattern groupings, Vertex and Flourish, provide an evolution of complementary aesthetics in large, medium and small scales for fluid movement throughout an interior.

Vertex, a geometry expression for where two or more lines meet, interprets where humanity, technology and nature collide. Graphic and dimensional, scales of intricate hexagonal shapes warp and spiral to achieve a modern, innovative dimensionality on the floor.

**Flourish** in Dark with Green and **Flourish Small Coordinate** in Dark

## FLOURISH

Flourish highlights the outcome when various facets of one's surrounding influences meet and connect in harmony. The progression of Vertex into a series of patterns that are more organic, Flourish illustrates the positive effect of one embracing technology in a way that fits his or her world, not defines.

Milliken's signature nuanced gradation and edge transition capabilities fuse texture, pattern and color for a graceful asymmetry that maximizes spatial flexibility. These nuanced edges allow designers to use the floor to create eloquent design transitions between various interior spaces.

## CREATIVE GUESTROOMS

Reimagine what guestrooms can be using Immix as the foundation of your design. The collection's modularity invites the use of multiple patterns of soft and hard surfaces to create inset area rugs, much like one's home.

Take advantage of the flexibility that modular carpet affords by strategically inserting additional tiles under guest beds. Simply swap tiles when replacement is required and your guest room stays in commission even amid repairs.

## TEXTURED BASES

Mirroring the different components and layers in nature and throughout one's life, Immix offers three distinct avenues to create multiple dimensionalities: pattern, color and tactile texture through the base construction.

Immix is available in four levels of textured carpet bases to complement the overall designs:

- HX tile highlights the hexagonal forms within Vertex for an extra layer of drama and dimension.

- IM tile offers a more conservative multi-directional linear texture with horizontal and vertical lines.

- Strato Alto tile features a linear surface, highlighting organic vertical lines.

- Royal texture broadloom offers an understated sophistication with a shimmering fleck.

The Immix collection is available in 1-meter by 1-meter modular carpet tiles and 13'6" broadloom. A luxurious PVC-free cushion backing enhances comfort underfoot, extends the floor covering's lifespan up to 40 percent, and wicks moisture vapor away from the subfloor to prevent mold and mildew growth.

## CONFERENCE

Immix subtle gradations and smooth edge effects create seamless transitions from color to color to build rugs or wayfinding markers. Or work with our design and visualization teams to create a custom layout for your large space. Custom minimums apply.

Flourish **Large Field** in Multi with Blue with **Flourish Large Field** in Multi with Brown
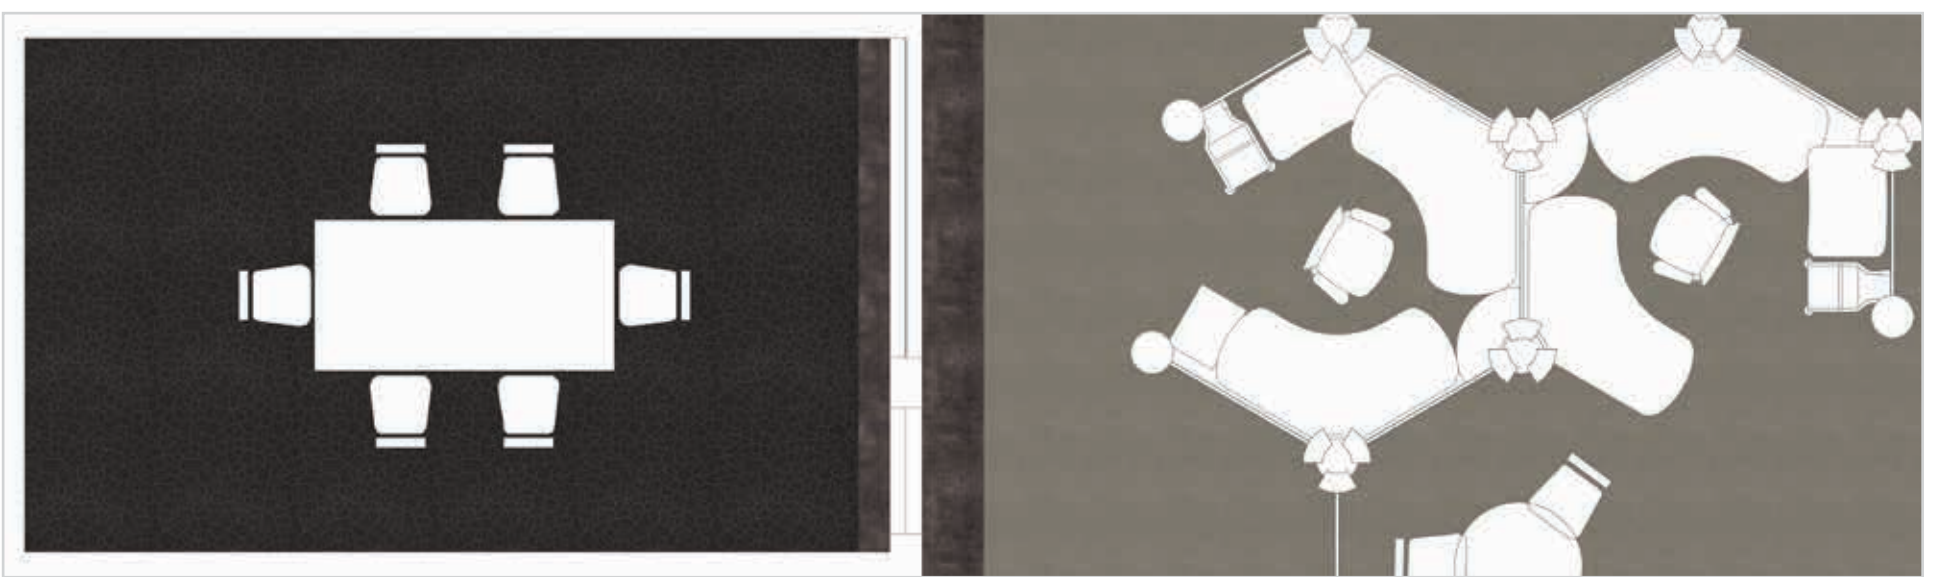

## MEETING

Layering color with different surface textures adds interest and depth to your flooring. The modularity of Immix allows for simple compatability with our LVT products.

**Flourish Small Coordinate** in Dark & Light with Polished Concrete LVT in POL13
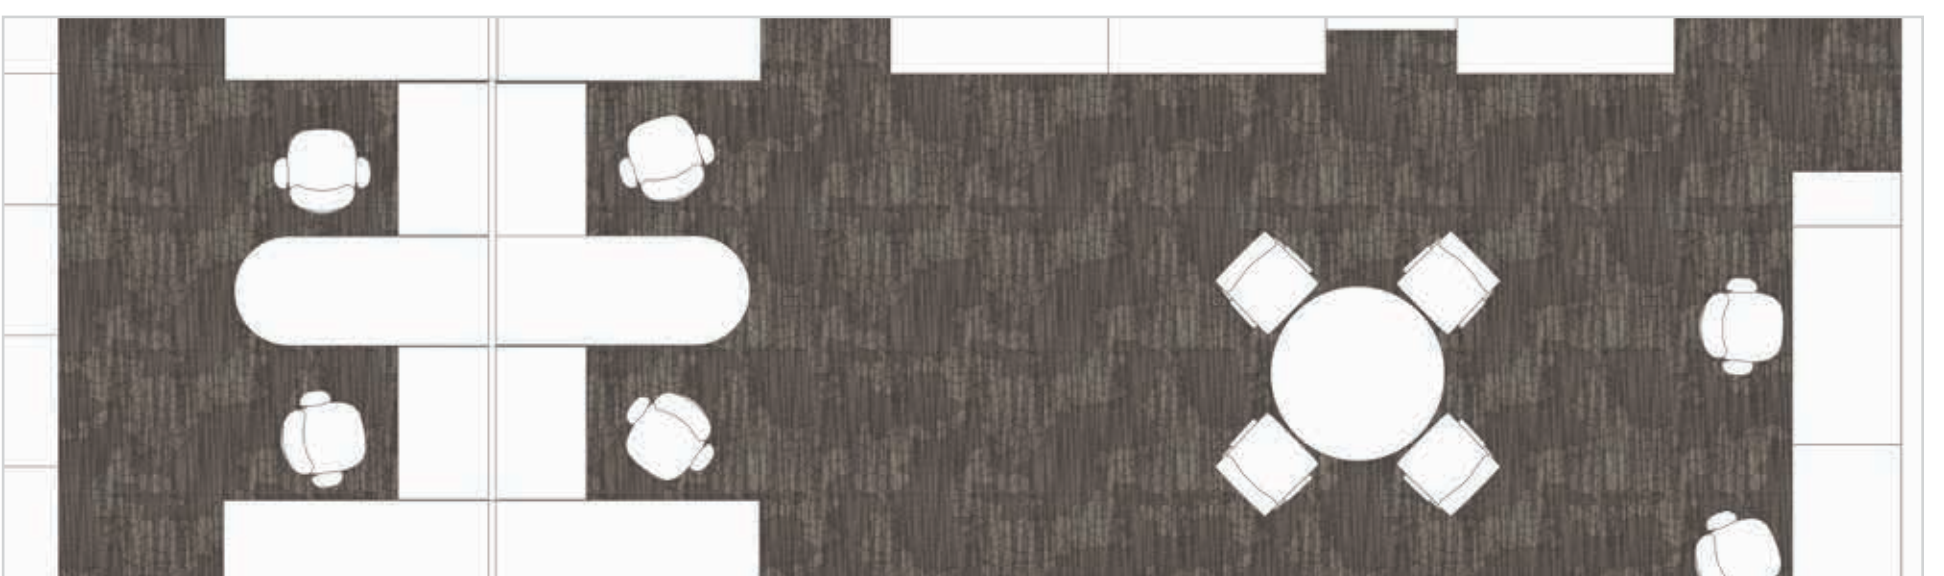

## OFFICE

Create unique worksaces with the continuous random design technology featured in Immix. With edges that repeat and various center patterns no two spaces will be the same.

## MILLIKEN'S GRADIENT PROCESS

With over 30 colors in each design, Immix demonstrates the creative power of Millitron®, Milliken's proprietary digital dye injection technologies. Using only 12 colors, the Millitron gradient process strategically mixes and places color, shaping both precise and nuanced patterns.

Our Millitron® brand of advanced digital dye injection technologies enables us to create an immeasurable amount of subtle variants of color. We're defining how pattern on the floor plane is created by color.

## CUSTOM COLOR PROCESS

Due to the gradient process, custom recoloring is not replaced color-for-color as traditionally done with most carpet technologies. Think of the carpet design as a photographic image which allows for color shifting or tinting. When recoloring the patterns in Immix, choose from our standard color choices of Light, Neutral, and Dark or provide us with color direction for your custom gradient.
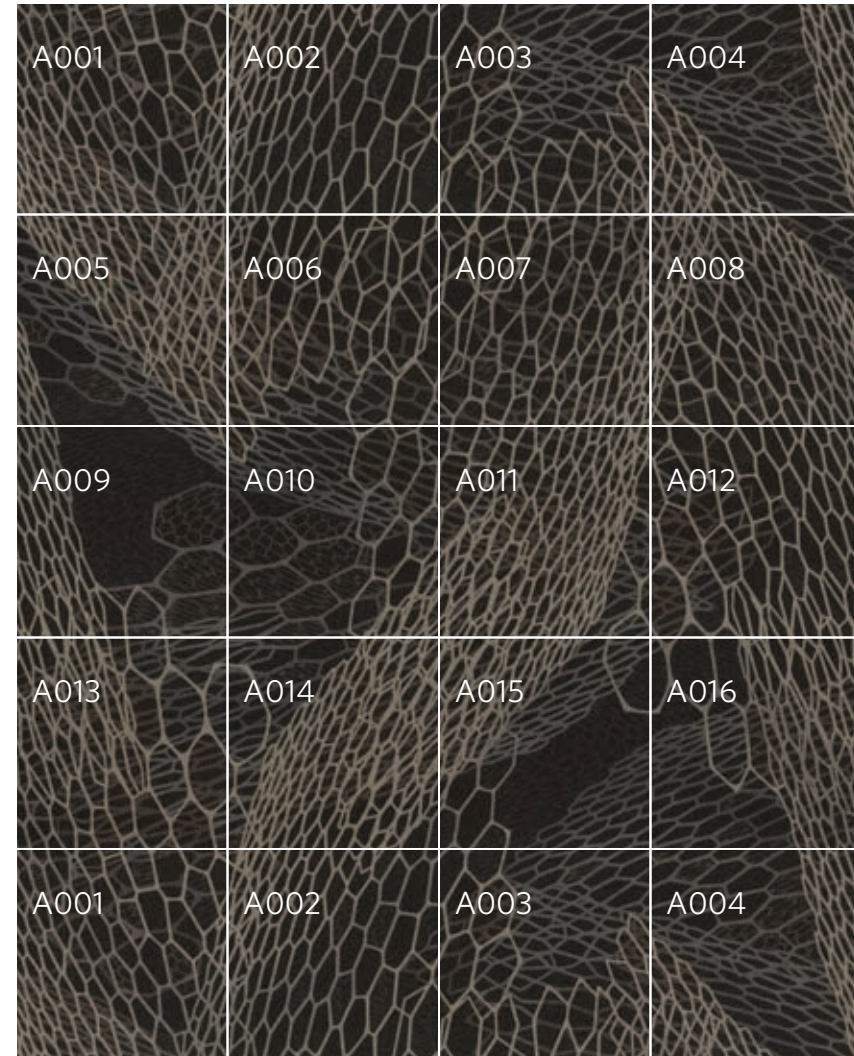

In order to create a custom color, select two new mid tones from the Pure Color Library. The Milliken Design team will then build the color spectrum by adding lighter and darker tones allowing us to achieve the best possible gradient of color. Using this new gradient, the design is recreated in the new enhanced color palette.

Because of the nature of this process, custom coloring needs to be planned in your project time line like custom design work. The end result is worth the extra time as ultimately each design is unique art for your specific project.

You provide the color direction.    Milliken creates the color spectrum.    Colors merge to create an enhanced image.
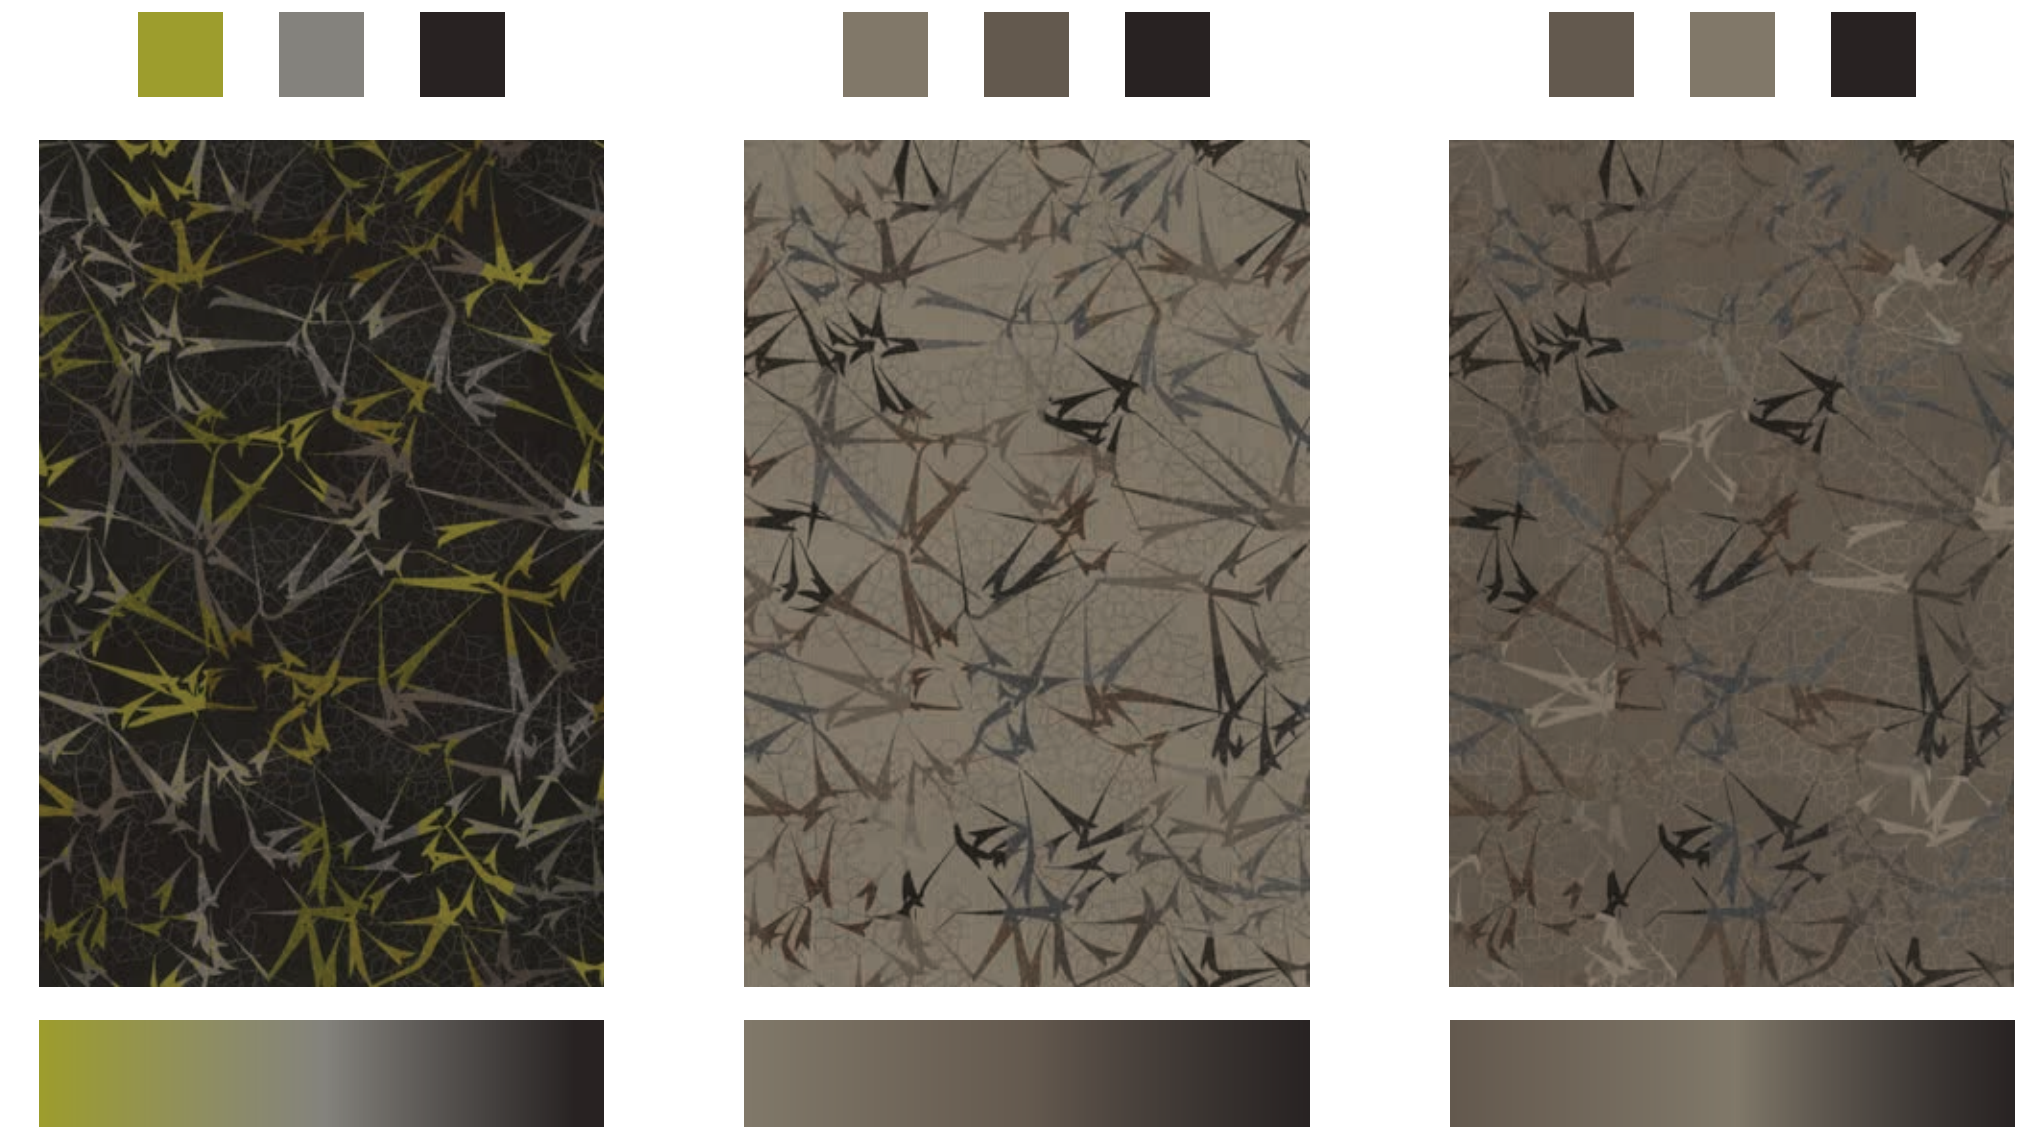

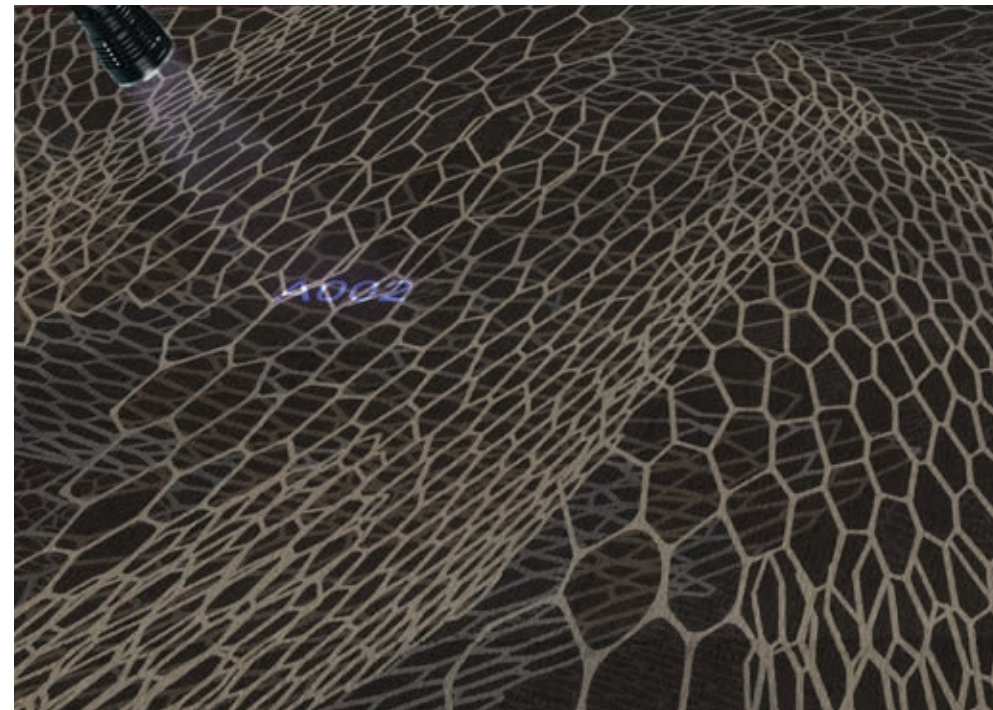

## INCODE

Elaborate large scale designs created with multiple unique tiles may seem overwhelming and a perceived installation challenge. However, Milliken's Incode is a unique technology that achieves large scale designs with an easy install process that benefits installers, specifying designers, and end-users.

Step 1

Step 2

## INCODE PROCESS

**STEP 1** — Milliken creates an installation map and SKU coding for each custom tile design.

**STEP 2** — While each tile is being manufactured, the unique code is dye injected into the carpet face using a temporary, UV sensitive dye.
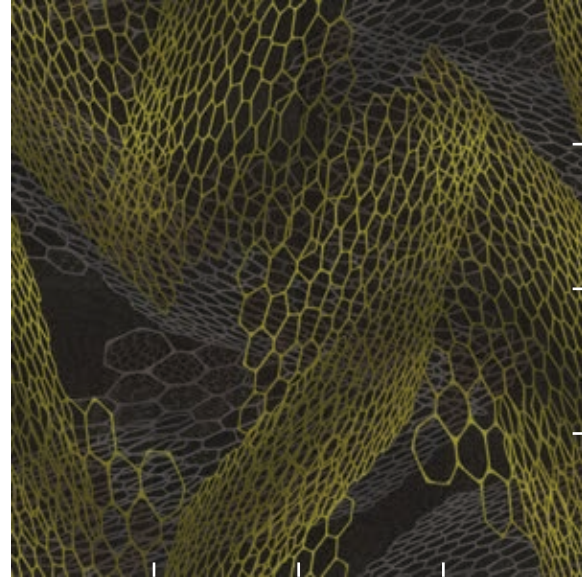

**STEP 3** — Once the code is revealed with a UV light, the installation becomes as simple as 'install by numbers'.

# ADVANTAGES OF MILLIKEN CARPET TILE

## Cushion Backing

Comfort Plus® & Underscore™ are Milliken's latest generation cushion backing systems and are standard on Milliken modular carpet products. In addition to providing superior underfoot comfort and significantly improving the carpet's wear performance, these cushion backings also offer ergonomic, acoustic, and environmental benefits.

Milliken cushion backing protects the carpet face from wear and can extend the carpet's life by up to 40%. Acting like an insulating shock absorber, Milliken cushion backings protect against wear, improve appearance retention and enhance comfort and safety. Cushion backing also helps Milliken carpets earn test ratings of Severe in the TARR system.

Milliken cushion-backed carpet tiles are unmatched in moisture management. They stop liquids at the surface and wick moisture away from the sub-floor thereby reducing conditions for mold and mildew growth. By allowing high levels of moisture to be transported through the tile, Milliken modular tiles can handle water vapor emissions up to 85% relative humidity. This unique feature eliminates one less worry about carpet in a high-humidity environment.

**CUSHION IMPROVES ACOUSTICS**
Much emphasis is placed on the need to reduce unwanted noise in corporate and public spaces. Reducing noise levels can improve comfort, well-being, the ability to concentrate and yield higher performance and productivity. Milliken cushion-backed tiles achieve an improvement in sound absorption performance by absorbing sounds across a wide range of frequencies including those most associated with human speech. Milliken's cushioned carpet tiles absorb up to 50% more noise than hard-backed carpets and up to 12X more than hard surface and rubber flooring. Better yet, the new LEED v4 rewards designers for providing spaces that facilitate better communications by offering up to 2 LEED points. Clearly, acoustics matter.

## StainSmart®

StainSmart® is a proprietary treatment applied to Milliken modular carpets to provide Stain Resist and Soil Release characteristics. This treatment provides state-of-the-art protection against penetrating stains and soil. It's a dual action technology that enables liquid and oil-based spills to bead up and be easily removed from the carpet. The treatment becomes an inherent part of the carpet so it's durable over years of use, even in high traffic.

**Stain Resist:** This chemistry blocks the dye sites of the nylon fiber, lessening the ability of a stain to bond with the fiber.

**Soil Release:** Prevents soil from adhering to or imbedding in the fiber surface and enhances the efficiency of soil removal when proper cleaning techniques are followed.

Milliken warrants that carpet treated with StainSmart will resist soiling and staining for 10 years. Proper maintenance is vital to the long-term effectiveness of the StainSmart treatment. Soaps used in wet-cleaning processes, especially spin bonnet, can cause rapid resoiling and effectively negate the protection built into the product. Milliken recommends the MilliCare® Textile and Carpet Care Service Network.

# Complete Flooring Solutions

With an industry leading selection of high-performance broadloom, modular carpet, and LVT options, we are inspired to create exceptional hospitality flooring products that will inspire you and your guest.

Whether a custom option from our easy to specify Millitron® patterning technology or a solution dyed nylon carpet tile for a refresh, we have the right color, pattern, and construction that adds value to your property. From the front door, through the lobby to the ballroom and guest room, Milliken brings innovative design to every corner of your property.

## Hospitality Broadloom & Modular Carpet

Milliken's broadloom and carpet tile constructions incorporate the latest innovations in tufting and dyeing technology, achieving desired aesthetics and excellent performance. With our virtually unlimited color capability and easy to use custom design systems, creating inspiring carpets that achieve brand standards is easy. Our Color Reference system makes coordinating multiple products across a single project a snap; whether it's carpet, LVT, or entry systems. All modular carpet tile products have industry leading cushion backing that offers an extended lifespan, ergonomic and environmental benefits as well as requiring no moisture testing above grade or on new slabs. Broadloom carpet also has cushion-back options, and all are standard with StainSmart®, a proprietary treatment applied to Milliken carpets to protect against stains and enhance soil release.

## Luxury Vinyl Tile

From natural looks of wood and stone to more modern textures and abstracts, Milliken's collection of Luxury Vinyl Tile flooring creates new options for the hospitality interior. With industry leading wear-ratings and a variety of installation options, our LVT collection brings new and inspiring options for resilient flooring. Our simple-to-search Color Reference system provides easy coordination of the LVT options to modular and broadloom carpets. From carpet tile to broadloom to planks to LVT, Milliken provides durable and elegant options for your project.

## Guest Rooms Modular Carpet

Whether digitally patterned or solution dyed nylon, our guest room carpet options solve many of the design, installation, and maintenance concerns of property owners. From creating new guest room updates and meeting brand standards with ease, to lowering both maintenance and installation costs, our guest room carpet offering creates a difference for your property. With a variety of constructions, colors and patterns, Milliken has the right guest room carpet for your next project.

## Trusted Performance

Milliken's hospitality flooring products provide peace of mind. With an industry leading 14 lifetime warranties, our flooring solutions bring value to the property each and every day. Industry-leading technologies, such as our ComfortPlus® cushion backing systems, help to create a more comfortable, quiet, and durable interior. Combine the expansive product options with our commitment to service and project coordination to see how Milliken can be your trusted partner to be sure each flooring decision is the best for your project.

## FEATURES & SPECIFICATIONS

**FACE WEIGHT —** With carpet tile, some manufacturers quote total weight and some quote face weight. Milliken reveals both. Immix is available in 36oz and 40oz face weight.

**BACKING —** Various backing types are available with different tile options. All Milliken tile comes standard with attached PVC-free polyurethane cushion. Milliken broadloom has Endura-Loc™ High Performance Backing with woven latex secondary.
Attached pad is an upgrade option.

**DIMENSIONAL STABILITY —** For carpet tile, it is imperative that the tile remain flat and dimensionally stable and secure to the floor under extreme conditions (humidity, temperature, & rolling traction). All Milliken modular carpet products are certified with the Aachen test and pass for dimensional stability.

**STAIN AND SOIL PROTECTION —** Food and beverage spills in public environments require product performance enhancements to help with long term cleanability and overall appearance. All Milliken carpet products include as standard our StainSmart® technology- a chemically bonded stain and soil resist technology.

**MOISTURE BARRIER —** For added performance, tile is standard with a barrier layer that prevents moisture from penetrating through the backing. Upgradeable option on broadloom.

## Strato Alto

**Construction**
Tufted, Patterned Cut-Pile Carpet Tile

**Dye Method**
Digital Millitron® Dye Injection

**Tile Size**
1m x 1m (39.4" x 39.4")

**Yarn Type**
Milliken WearOn® BCF Nylon Type 6,6

**Stain Resist / Soil Release**
StainSmart®

**Tufted Face Weight**
32 oz./sq.yd. (1,085.0 g./sq.m.)

**Finished Pile Height**
0.23 in. sheared (5.8 mm.)

**Average Density**
5,009

**Standard Backing**
PVC-Free Comfort Plus® ES Cushion Secondary with Synthetic Woven/Non-Woven Composite Primary

**Recommended Installation Methods**

MONOLITHIC

## IM

**Construction**
Tufted, Patterned Cut-Pile Carpet Tile

**Dye Method**
Digital Millitron® Dye Injection

**Tile Size**
1m x 1m (39.4" x 39.4")

**Yarn Type**
Milliken WearOn® BCF Nylon Type 6,6

**Stain Resist / Soil Release**
StainSmart®

**Tufted Face Weight**
36 oz./sq.yd. (1,220.7 g./sq.m.)

**Finished Pile Height**
0.20 in. sheared (5.08 mm.)

**Average Density**
6,896

**Standard Backing**
PVC-Free Comfort Plus® ES Cushion Secondary with Synthetic Woven/Non-Woven Composite Primary

**Recommended Installation Methods**

MONOLITHIC

## HX

**Construction**
Tufted, Textured Loop, Tip Shear

**Dye Method**
Digital Millitron® Dye Injection

**Tile Size**
1m x 1m (39.4" x 39.4")

**Yarn Type**
Milliken WearOn® BCF Nylon Type 6,6

**Stain Resist / Soil Release**
StainSmart®

**Tufted Face Weight**
36 oz./sq.yd. (1,220.7 g./sq.m.)

**Finished Pile Height**
0.23" (5.842 mm.)

**Average Density**
6,583

**Standard Backing**
