

ALLUMÉ

*Milliken*TM

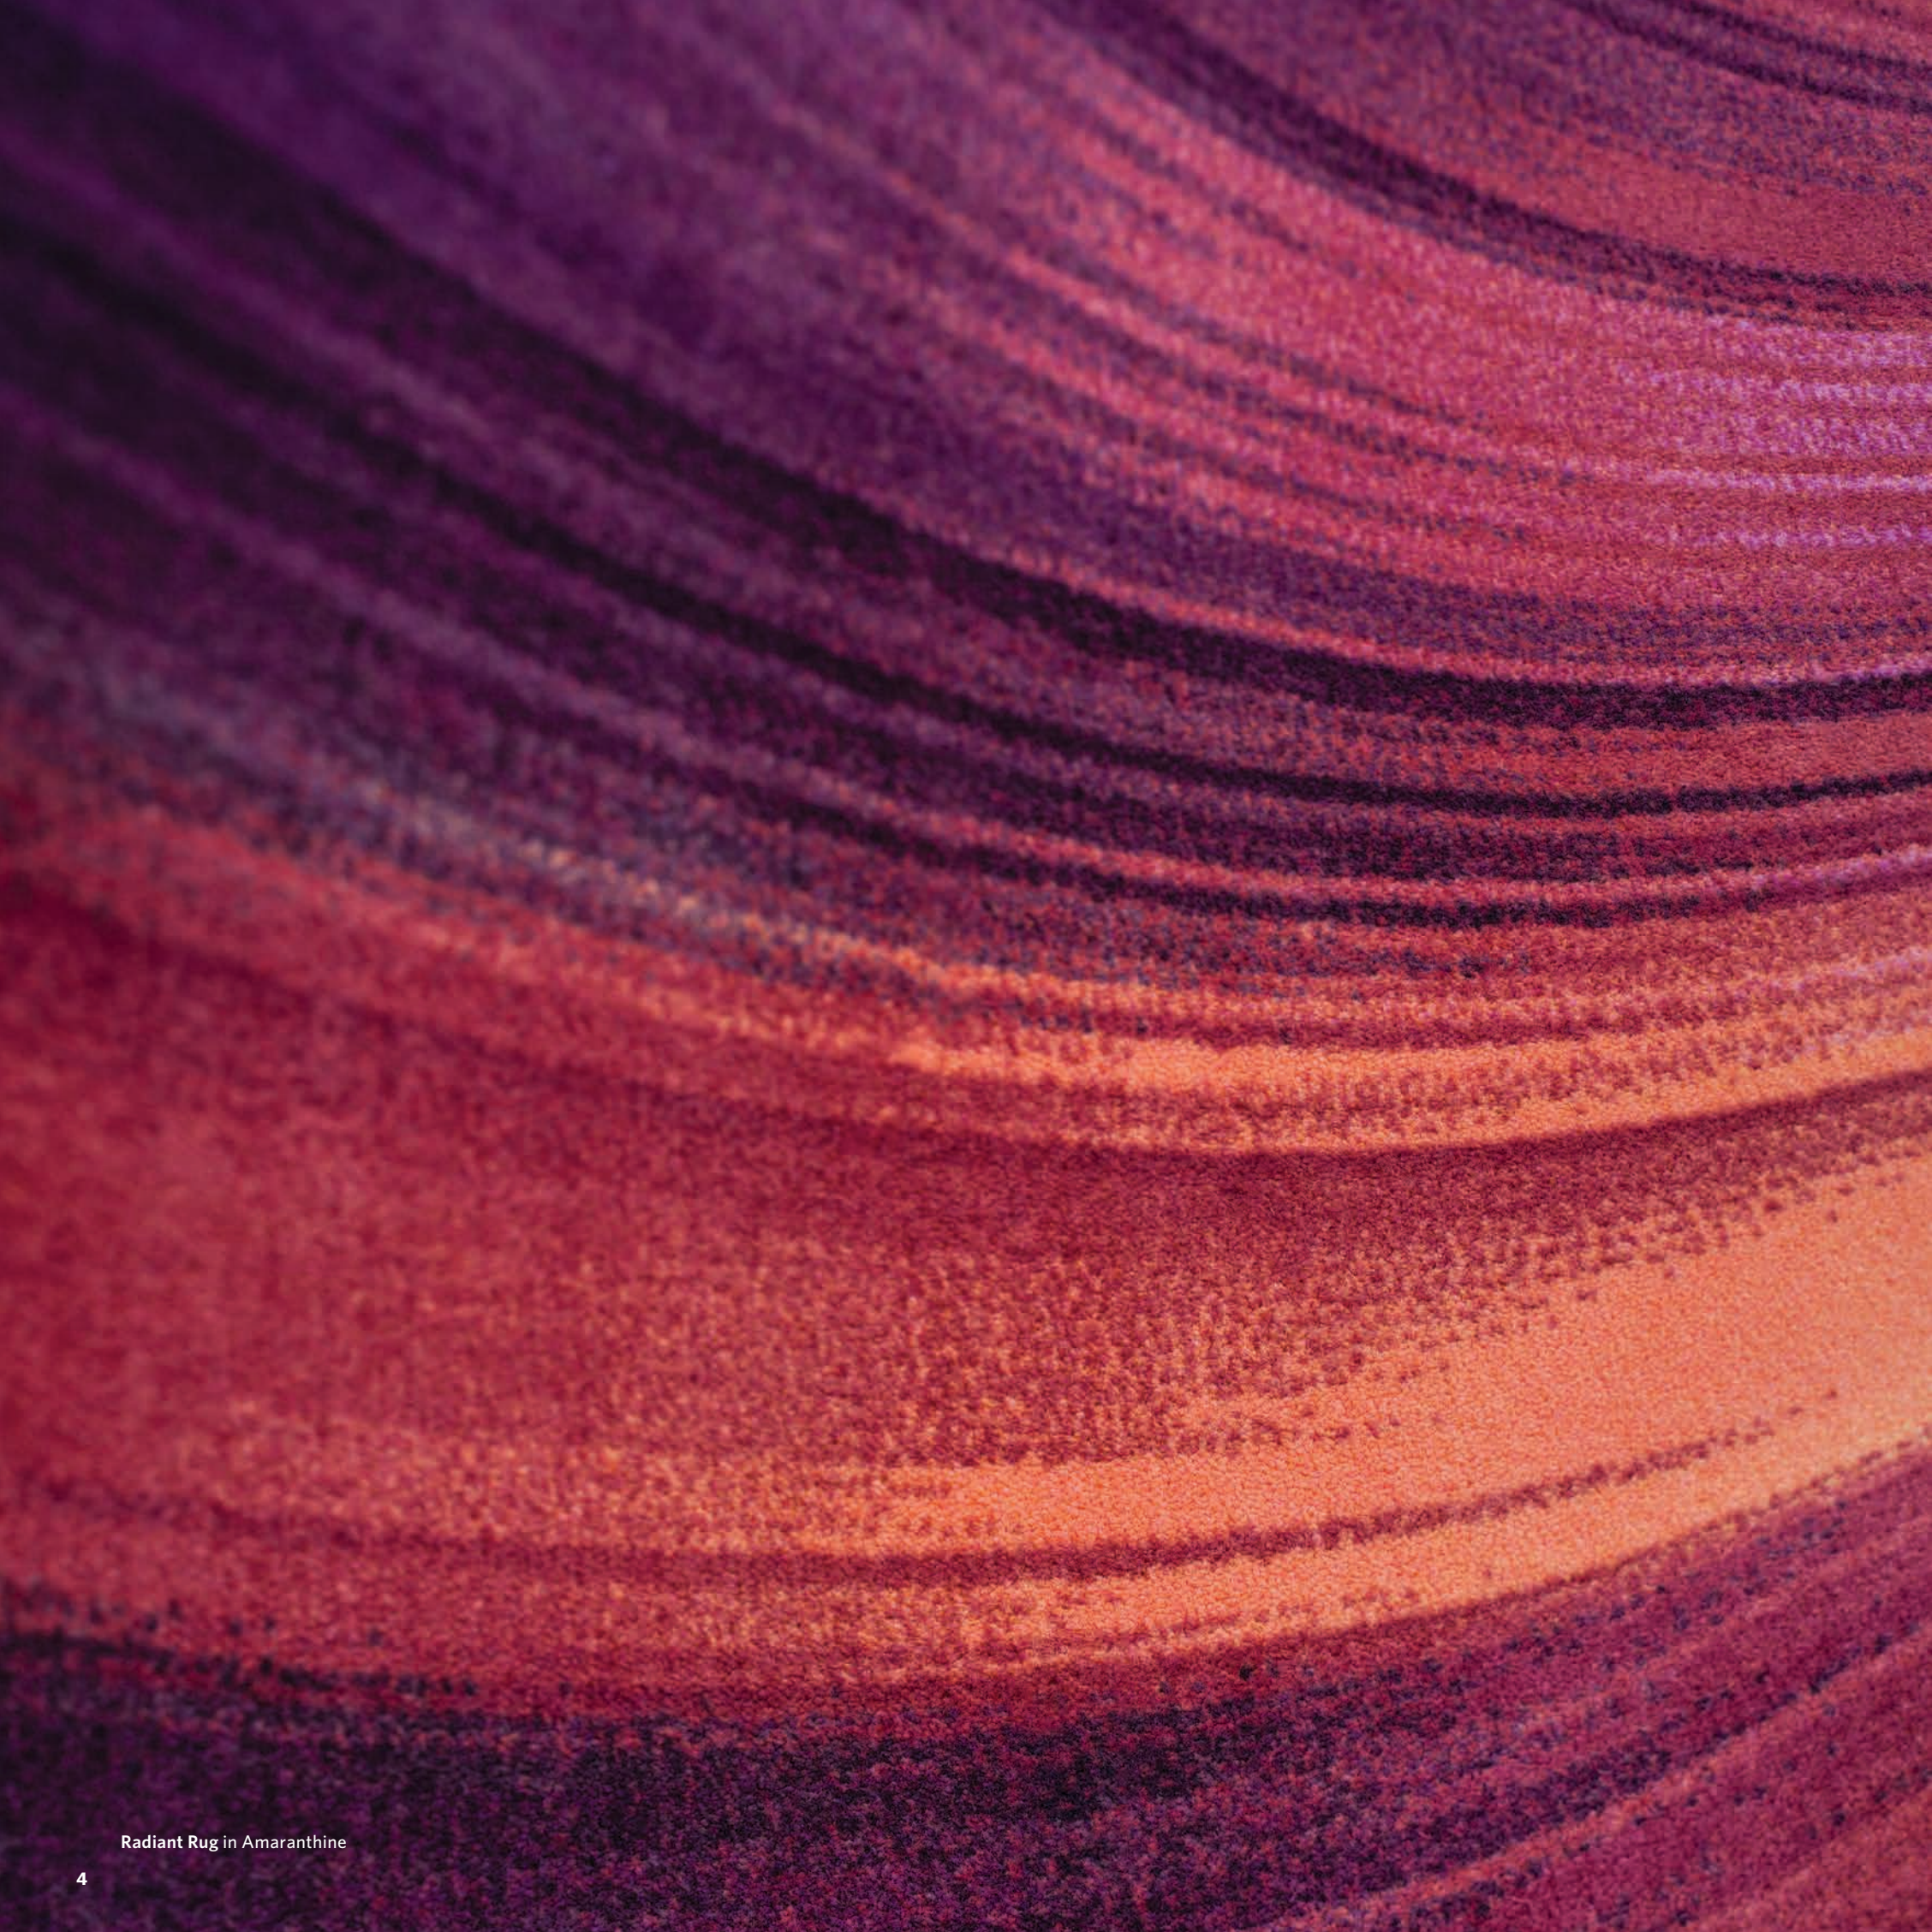

INSPIRED. INSPIRING.

Light single-handedly captures our focus. It makes life visible, sight possible, and influences or perhaps pre-determines our emotional response.

The Allumé Collection is a study of light. It explores the nuances and subtle variations created by this familiar resource; how it creates shapes, reflects from surfaces, streams through materials, or radiates. Allumé celebrates the intrinsic beauty of light through the exploration of gradients and translucency that transition from bright and vibrant to brooding and mysterious.

Begin your exploration of light and the stunning drama of Allumé.

RADIANT

— *emitting rays of light.*

Allumé Radiant emanates the subtle gradients of color as if it were light emitted across a surface. Edges are soft with movement and allow for multiple tones to be realized.

Allumé Radiant is light in motion.

Radiant Random in Amaranthine

Radiant Rug in Amaranthine

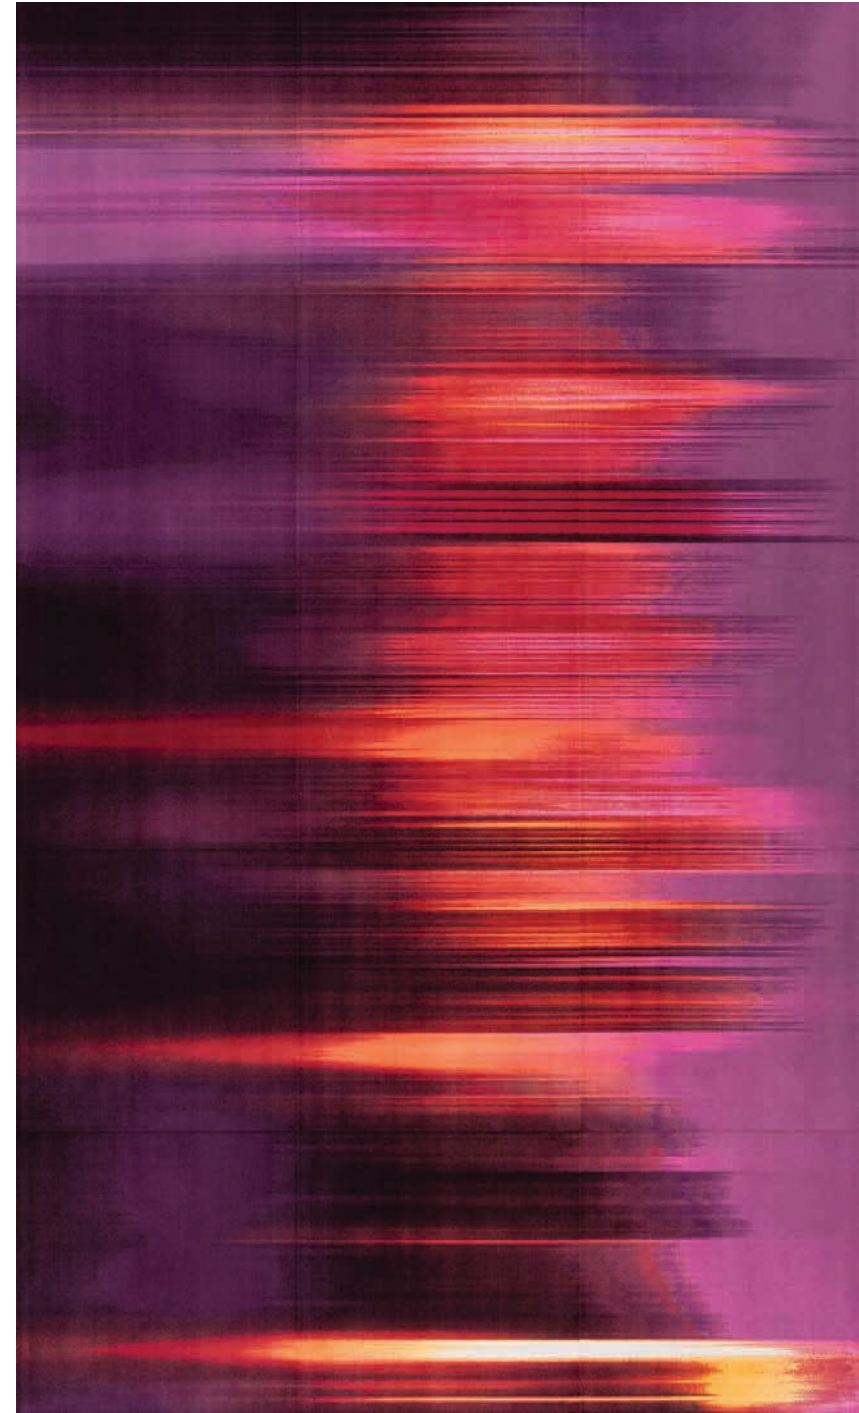

SUBTLE GRADIENTS

Transition from the dynamic to the subtle where colors smoothly move from one to the other without pause or distraction. The design choices within Allumé allow for quiet serenity or drama and seamless movement from public to private spaces. A high resolution print process creates layers of color offering elegance and sophistication to the floor plane.

REFLECTIVE

— *light changes direction as a result of “bouncing off” a surface like a mirror.*

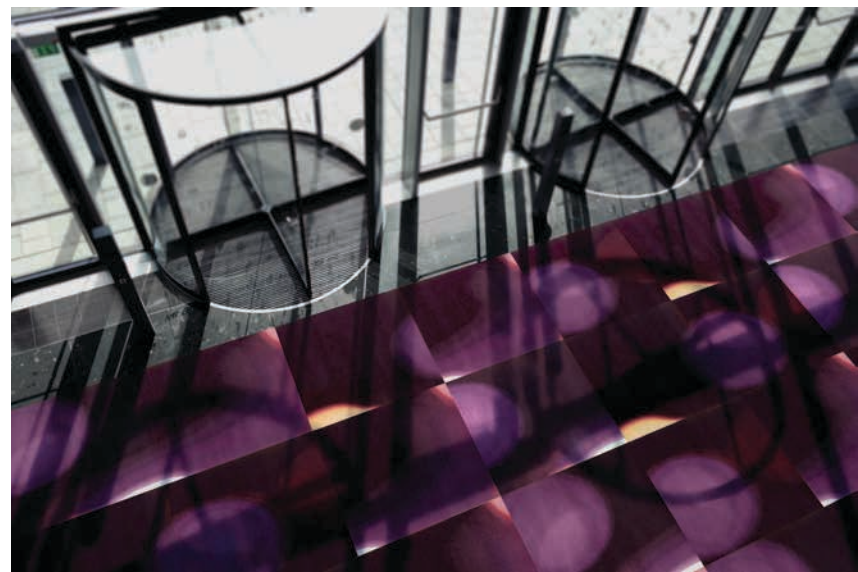

Witness light’s inherent nature to reflect an image. This abstraction of a city skyline on water is achieved by the color vibrancy made possible through blending color in the printing process.

Light hovers and glows over the dark night background creating dimension and vibrancy almost electric in nature. Each time it’s viewed, the image reveals another nuance.

RANDOM BY DESIGN.

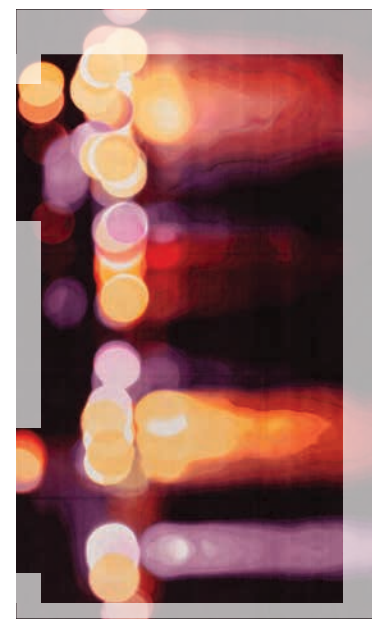

Allumé's random pattern options celebrate the diversity of the collection providing choices of scale and installation strategies. This feature allows the selection of all or a few of the unique modular pieces from Allumé to customize your floor. Designs are not a result of tile limitations, but embrace the ability to design each tile uniquely and as an individual. Combine 10 individual tile patterns to create a uniquely random image. Use all 10 or any combination. Bold or subtle, you control the effect.

FOCUS

— *a point at which rays of light converge.*

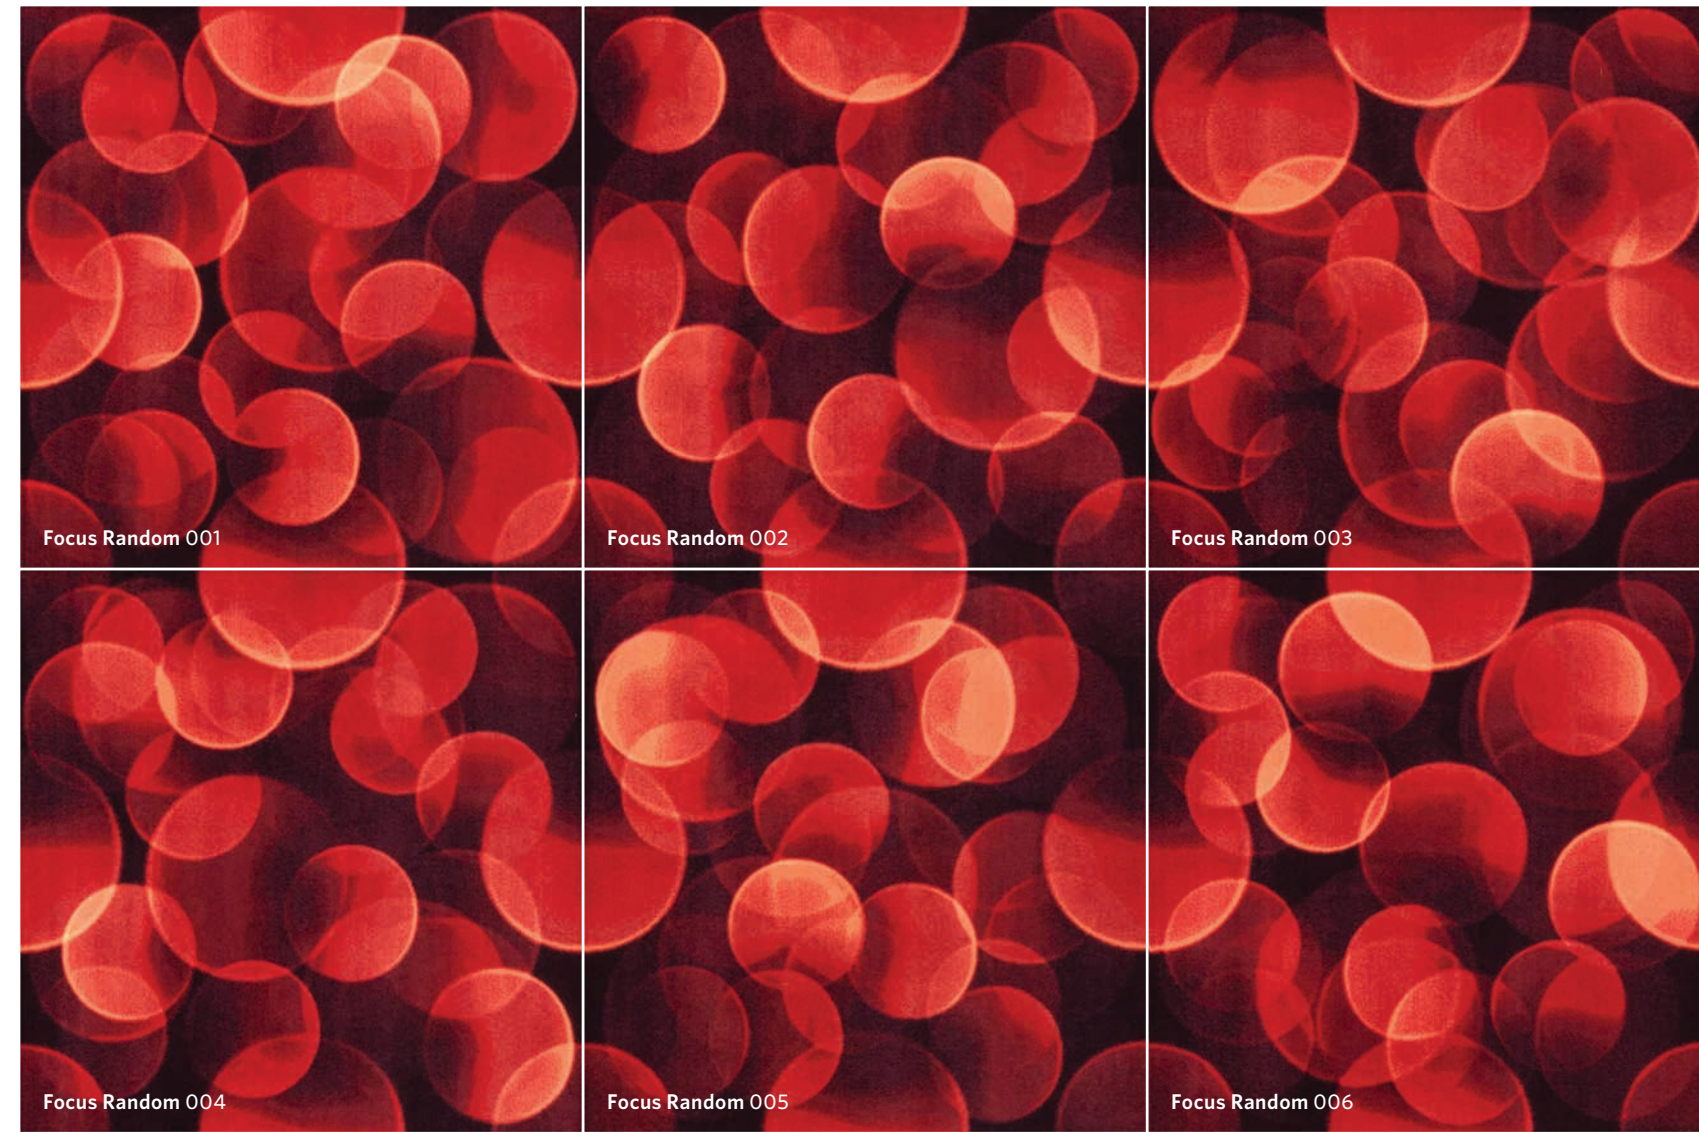

With highlight, there is interest. With translucency, there is mystery. In Allumé Focus, both are achieved. This design captures light's phenomenon of specular reflection. For Focus, numerous colors were carefully placed to replicate the translucent nature of light as well as the glow naturally created by light. The intentional light to dark gradient grounds the design and brings focus to the overlapping reflection from the lights.

Focus Rug in Amaranthine

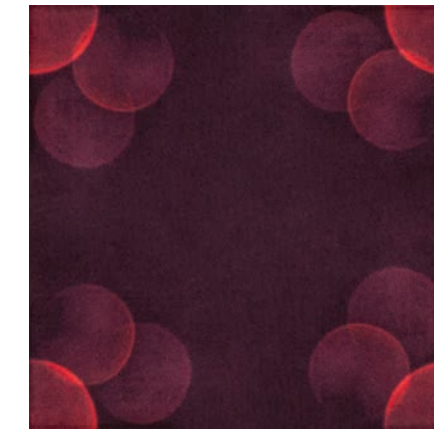

Focus Rug in Amaranthine

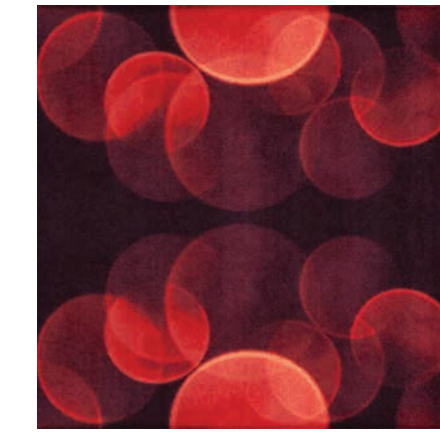

DESIGN FLOOR PLAN

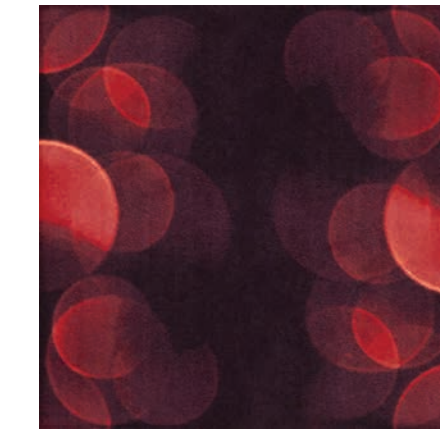

Easily create your own layout with the functionality available in the variety of options in the Focus pattern. Take advantage of the random continuous pattern as well as borders and corners to achieve different rug sizes with less waste and fewer SKU's. Also, place three of the unique accent tiles randomly throughout a layout to create interest with a splash of color.

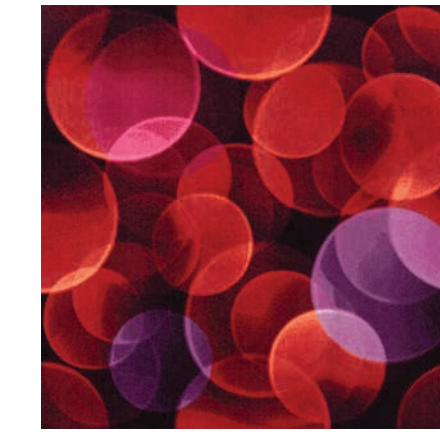

Focus Random Corner

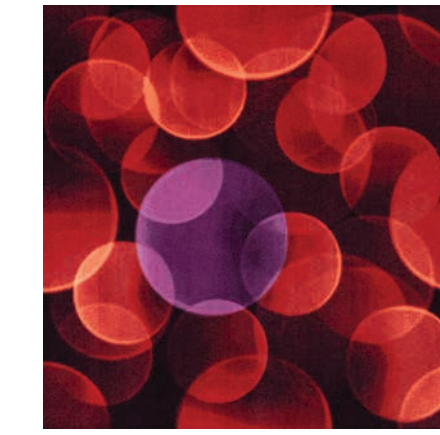

Focus Random Horizontal

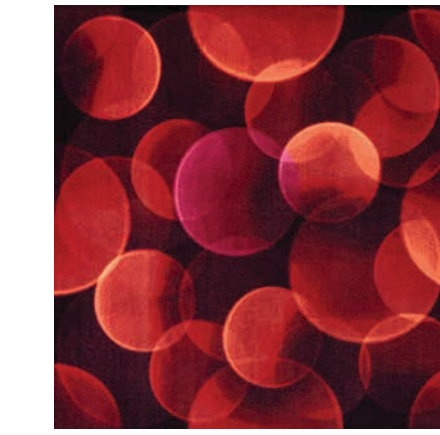

Focus Random Vertical

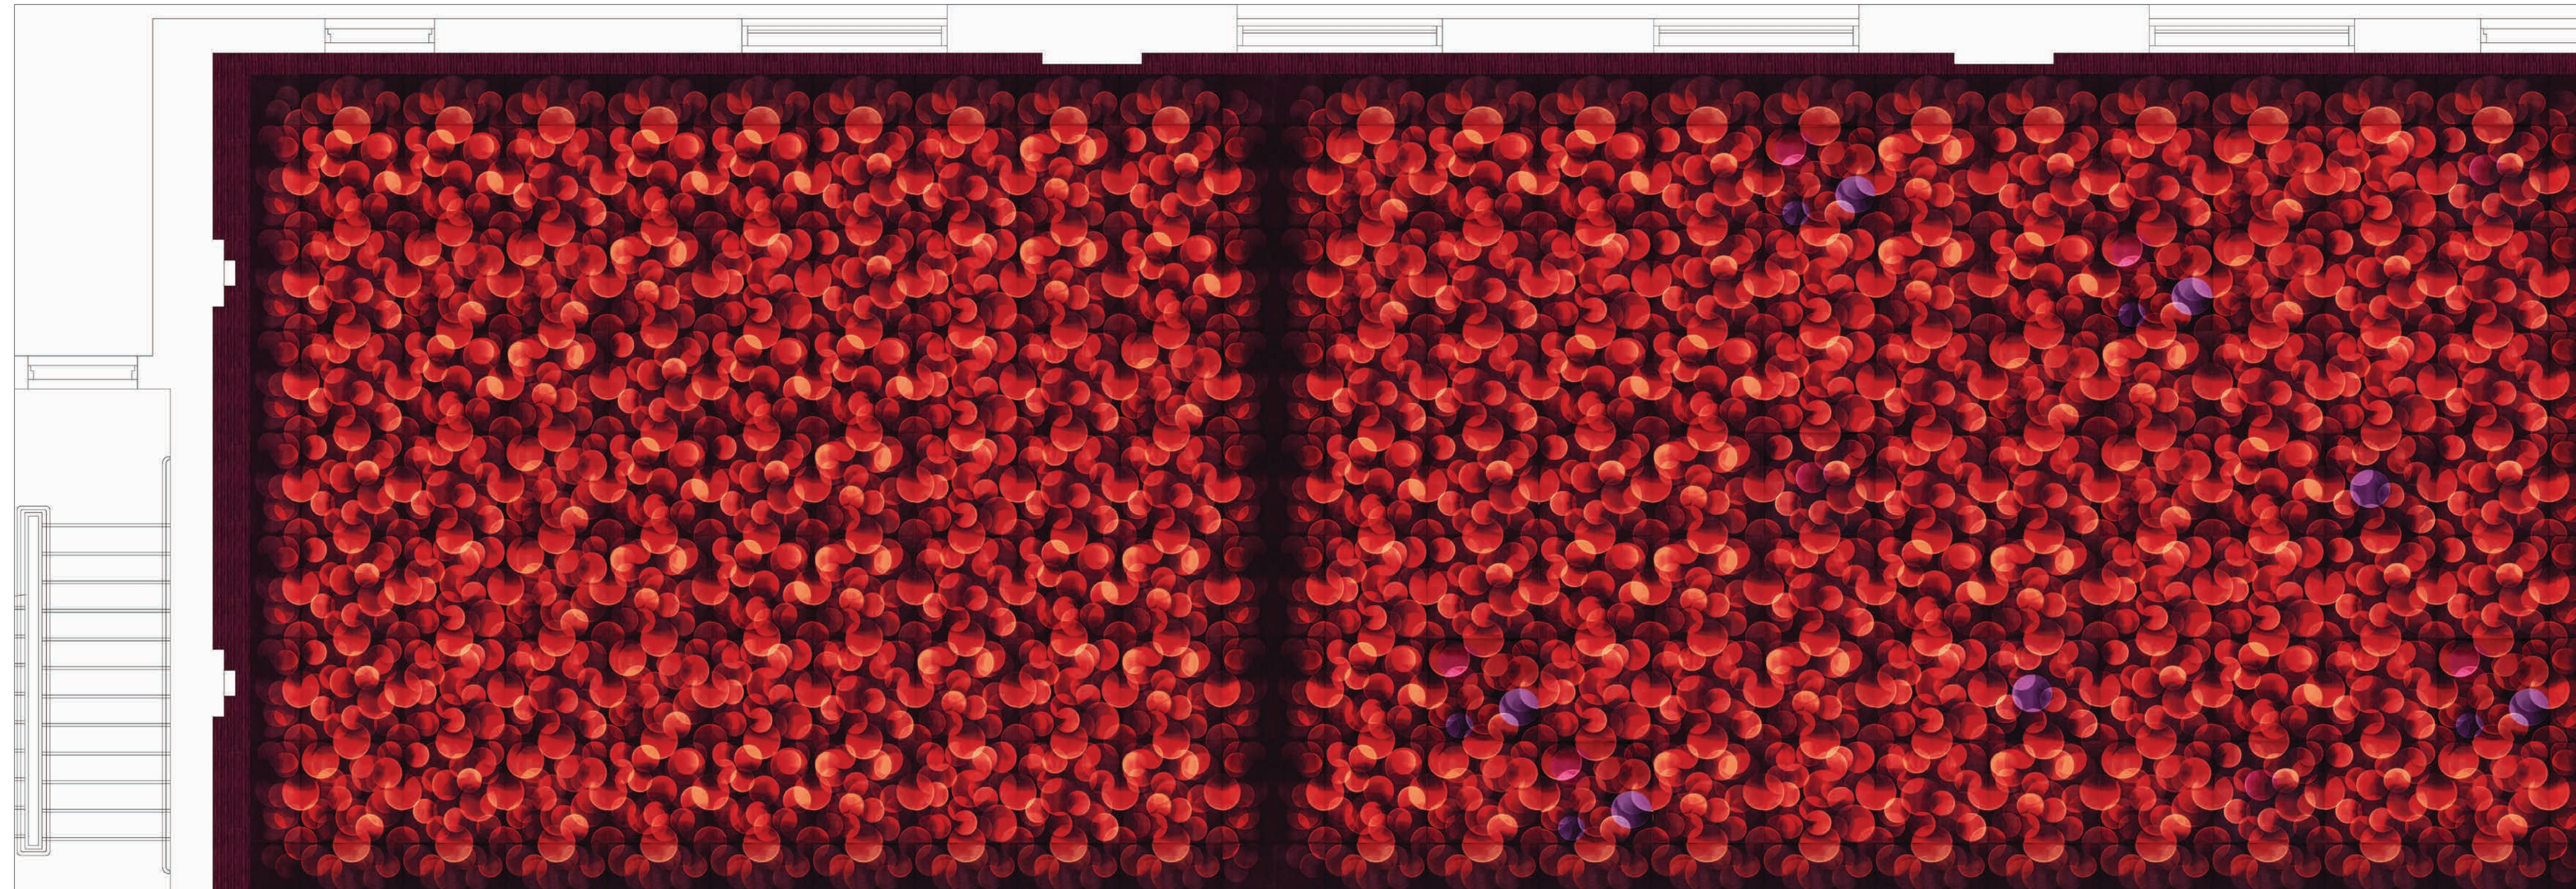

Focus Random Accent 1

Focus Random Accent 2

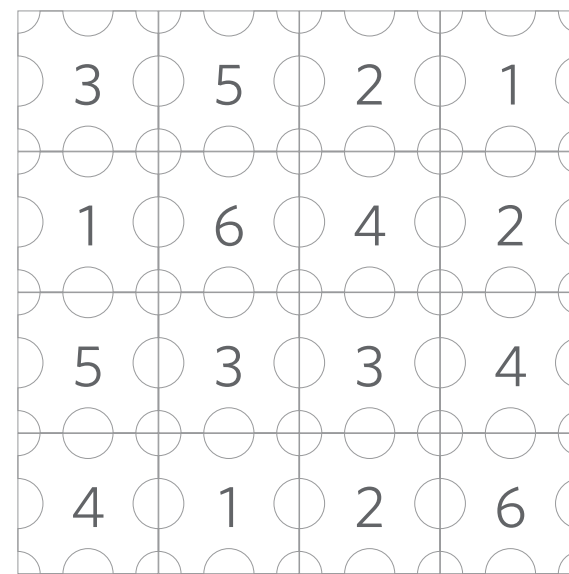

Focus Random Accent 3

CONTINUOUS RANDOM

Within Focus, we offer the capability to take random to a different level, with a subtle effect that offers infinite possibilities. Each of the 6 unique tiles offer edge-to-edge pattern matching while each having unique centers. This allows for continuous pattern match, that can be installed completely random, but the resulting aesthetic is a very large repeat.

STREAMS

— *a continuous beam or trail of light.*

Light in motion is the essence of this design. Immediately, there is an attraction to the energy of Streams. The dramatic range of colors create washes of light moving from deep and bright to a near luminous white. The bold sweeping lines provide a clean yet dynamic option sure to attract the attention of many a passerby.

MILLIKEN'S GRADIENT PROCESS

Allumé has an enhanced color palette.

With over 31 colors in each design, Allumé expands upon the availability of 12 colors in other designs. This new color freedom is achieved differently and requires a new way of processing color. The designs are created through a color gradient process eliminating the need to individually place color. Due to the advanced high resolution printing technique, many resulting subtle variants and trace colors are achieved. The color technique offered in this collection is leading the industry in how pattern is created by color.

Provide us with color direction and the Milliken Design team will make your custom creation a reality.

You provide the color direction.

Milliken creates the color spectrum.

Colors merge to create an enhanced image.

USING COLOR TO CREATE MOOD

MULTI-COLOR APPROACH — Our “Amaranthine” colorway exemplifies the vibrant multi-color possibilities of this collection. It utilizes eggplants, reds, pinks, yellow-oranges to whites to create perceived innumerable blends of nuanced color and an extreme white glow highlight for effect. Use elements of this or create your own using similar logic.

TWO COLOR APPROACH — Our “Ebb tide” colorway showcases a rich and slightly warm neutral range of color tones accented with a second highlight aqua color. This illustrates how the product can become softer than the multi-color approach, but offer the capability to have a range of color values from both background color and a single accent color.

MONOCHROMATIC APPROACH — Our “Anil” colorway showcases a deep cool neutral palette using an analogous deep indigo color to create overall monochromatic coloration. This approach offers the capability to simplify color down to a single range with only a tint of color to add depth. Either the warm colors from Ebb tide or the cool colors from Anil can be used as a quick and easy starting point to create other warm and cool, two-color or monochromatic colorways.

MULTI-COLOR APPROACH — Allows the change of all four dominant colors to create a totally new palette.

TWO COLOR APPROACH — Keep or select neutrals and accent color for a sophisticated two-color design.

MONOCHROMATIC APPROACH — Simply give us your color hue and this design creates a very subtle effect.

AMARANTHINE

EBB TIDE

ANIL

EBB TIDE

“Ebb tide” is a rich and slightly warm neutral range of color tones accented with a second highlight aqua color. This colorway enables the patterns in Allumé to become softer while maintaining the range of color values from both background color and a single accent color.

Throughout the Allumé collection, the designs showcase the focus, movement, and translucency of light. The ability to create dimensional, translucent effects is rare in a flooring textile. Milliken's innovative combination of color science and design brings this innovative and fresh approach to flooring to the market.

DESIGN LANGUAGE

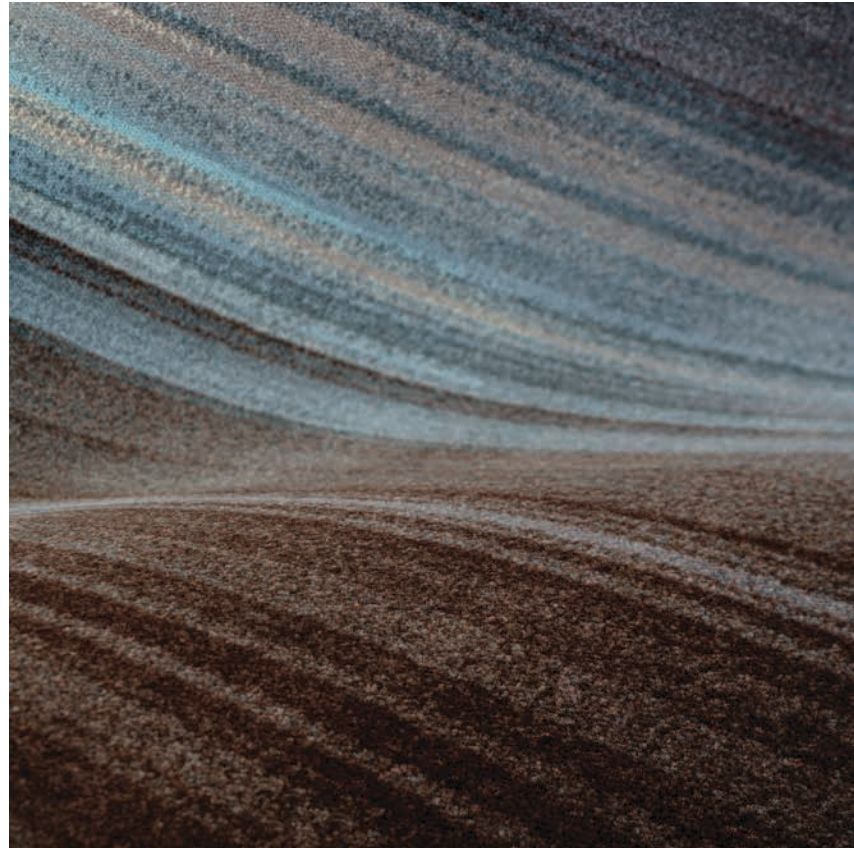

Each design — Radiant, Reflective, Focus and Streams — represent different aspects of light. However, each contains a common design language which allows them to flow seamlessly from one to the other. All of the design groups within Allumé provide the capability to add layers, scale, and variety to a project while connecting the spaces through this customizable, but similar design language.

LIGHT EFFECTS

Allumé continues the Milliken tradition of customizable patterning, however with this collection, the approach is new. Even though each design exists as a composition without layers, adding a light effect or new layer to any of these designs is easy. We have created several but you can send us your own light effect or layer for that final custom design

LARGE SCALE PRECISION

With Milliken modular tile, scale is not a limitation but a creative option. Our large scale precision layout allows for precise pattern match at each tile intersection. There is no sacrifice of design aesthetics for the functionality of tile as both are made possible with large scale precision.

MODULAR LAYOUTS

Milliken's modular carpet tile expertise is evident in this collection. Each design was created to provide scale, color spectrum, and luxury. The uniqueness of Milliken's technology and approach allows for the modular tile format to increase the flexibility and pattern possibilities, rather than being a limitation. Within the Allumé collection, there are 4 basic layout types: Large Scale Precision, Continuous Random, Random, and Single tile.

Each different type adds to the versatility of the collection.

1	2	3
4	5	6
7	8	9

LARGE SCALE PRECISION — Used to create large scale pattern repeats normally only achieved via broadloom. Each unique tile has only one location and must be installed numerically to achieve precise pattern match at the intersection of each tile. A detailed floor plan is provided to ensure all tiles are placed in the appropriate location to achieve the large scale aesthetic.

6	4	2
3	3	4
1	2	6

CONTINUOUS RANDOM — Installed randomly but achieves a large pattern match aesthetic. This innovative layout type is created using unique random designs that are all centrally different but that contain pattern match elements at each tile edge. No numeric installation sequence is required to achieve a very large repeat.

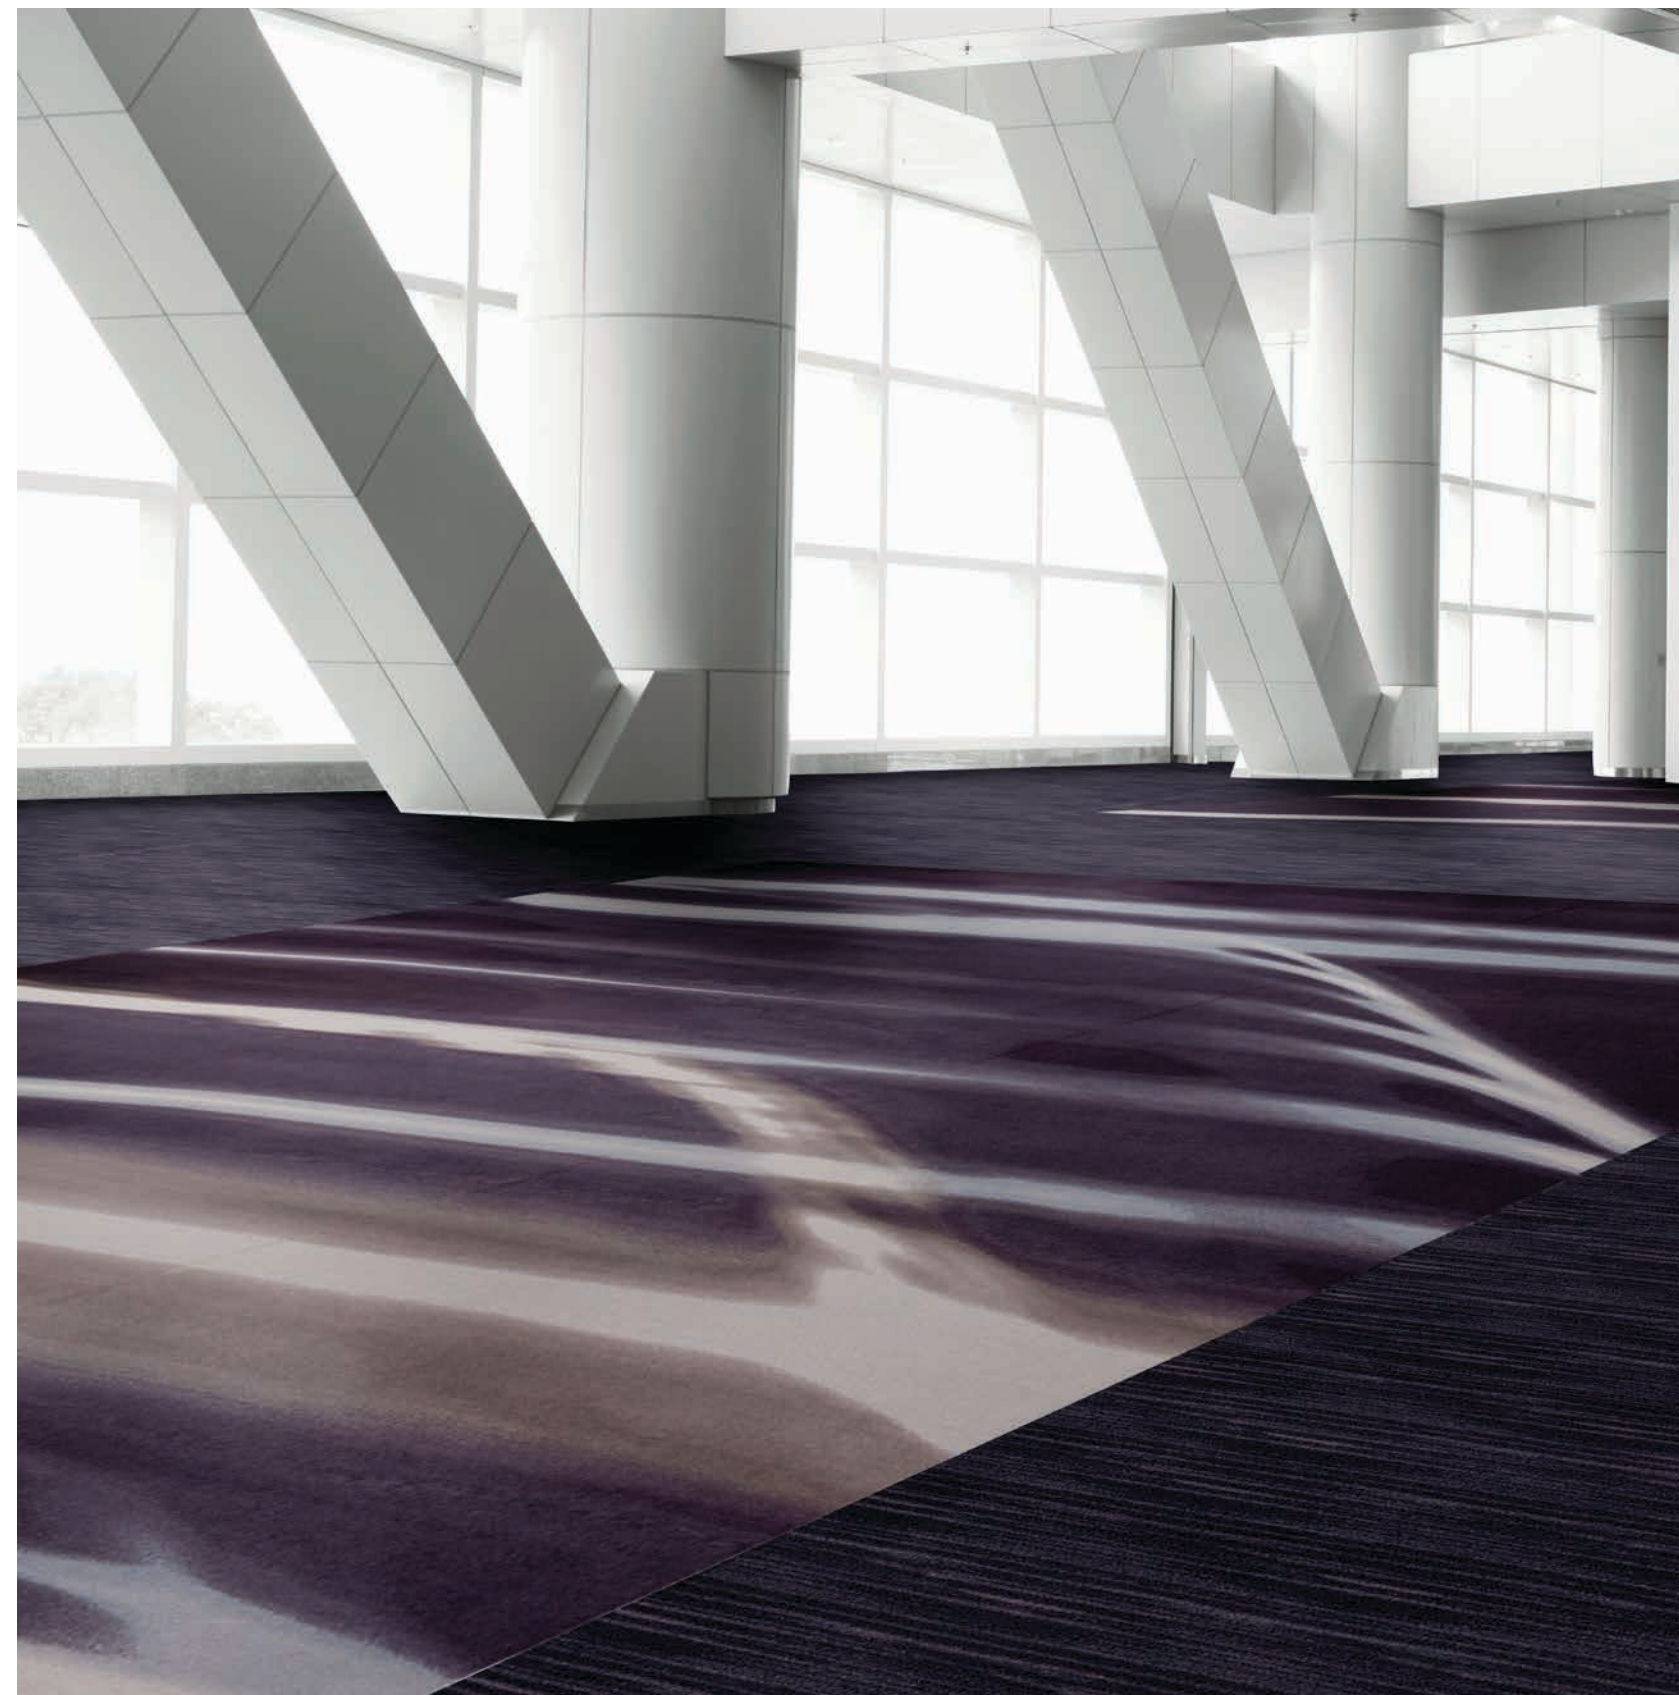

3	5	2
1	6	9
5	3	7

RANDOM — Contains multiple different tiles that are installed randomly with no pattern match at each tile. The variety in this layout type makes each installation unique without special installation instructions. The design is installed randomly from the delivery container with no particular order or placement required.

1	1	1
1	1	1
1	1	1

SINGLE TILE REPEAT — Each tile contains the entire pattern repeat. When installed monolithically, the pattern will match at each edge and does not require installation alignment. However, the design is confined to a single tile requiring no numeric order or SKU management on-site.

INCODE

Elaborate large scale designs crested with multiple unique tiles may seem overwhelming and a perceived installation challenge. However, Milliken's Incode is a unique technology that achieves large scale designs with an easy install process that benefits installers, specifying designers, and end-users.

STEP 1

STEP 2

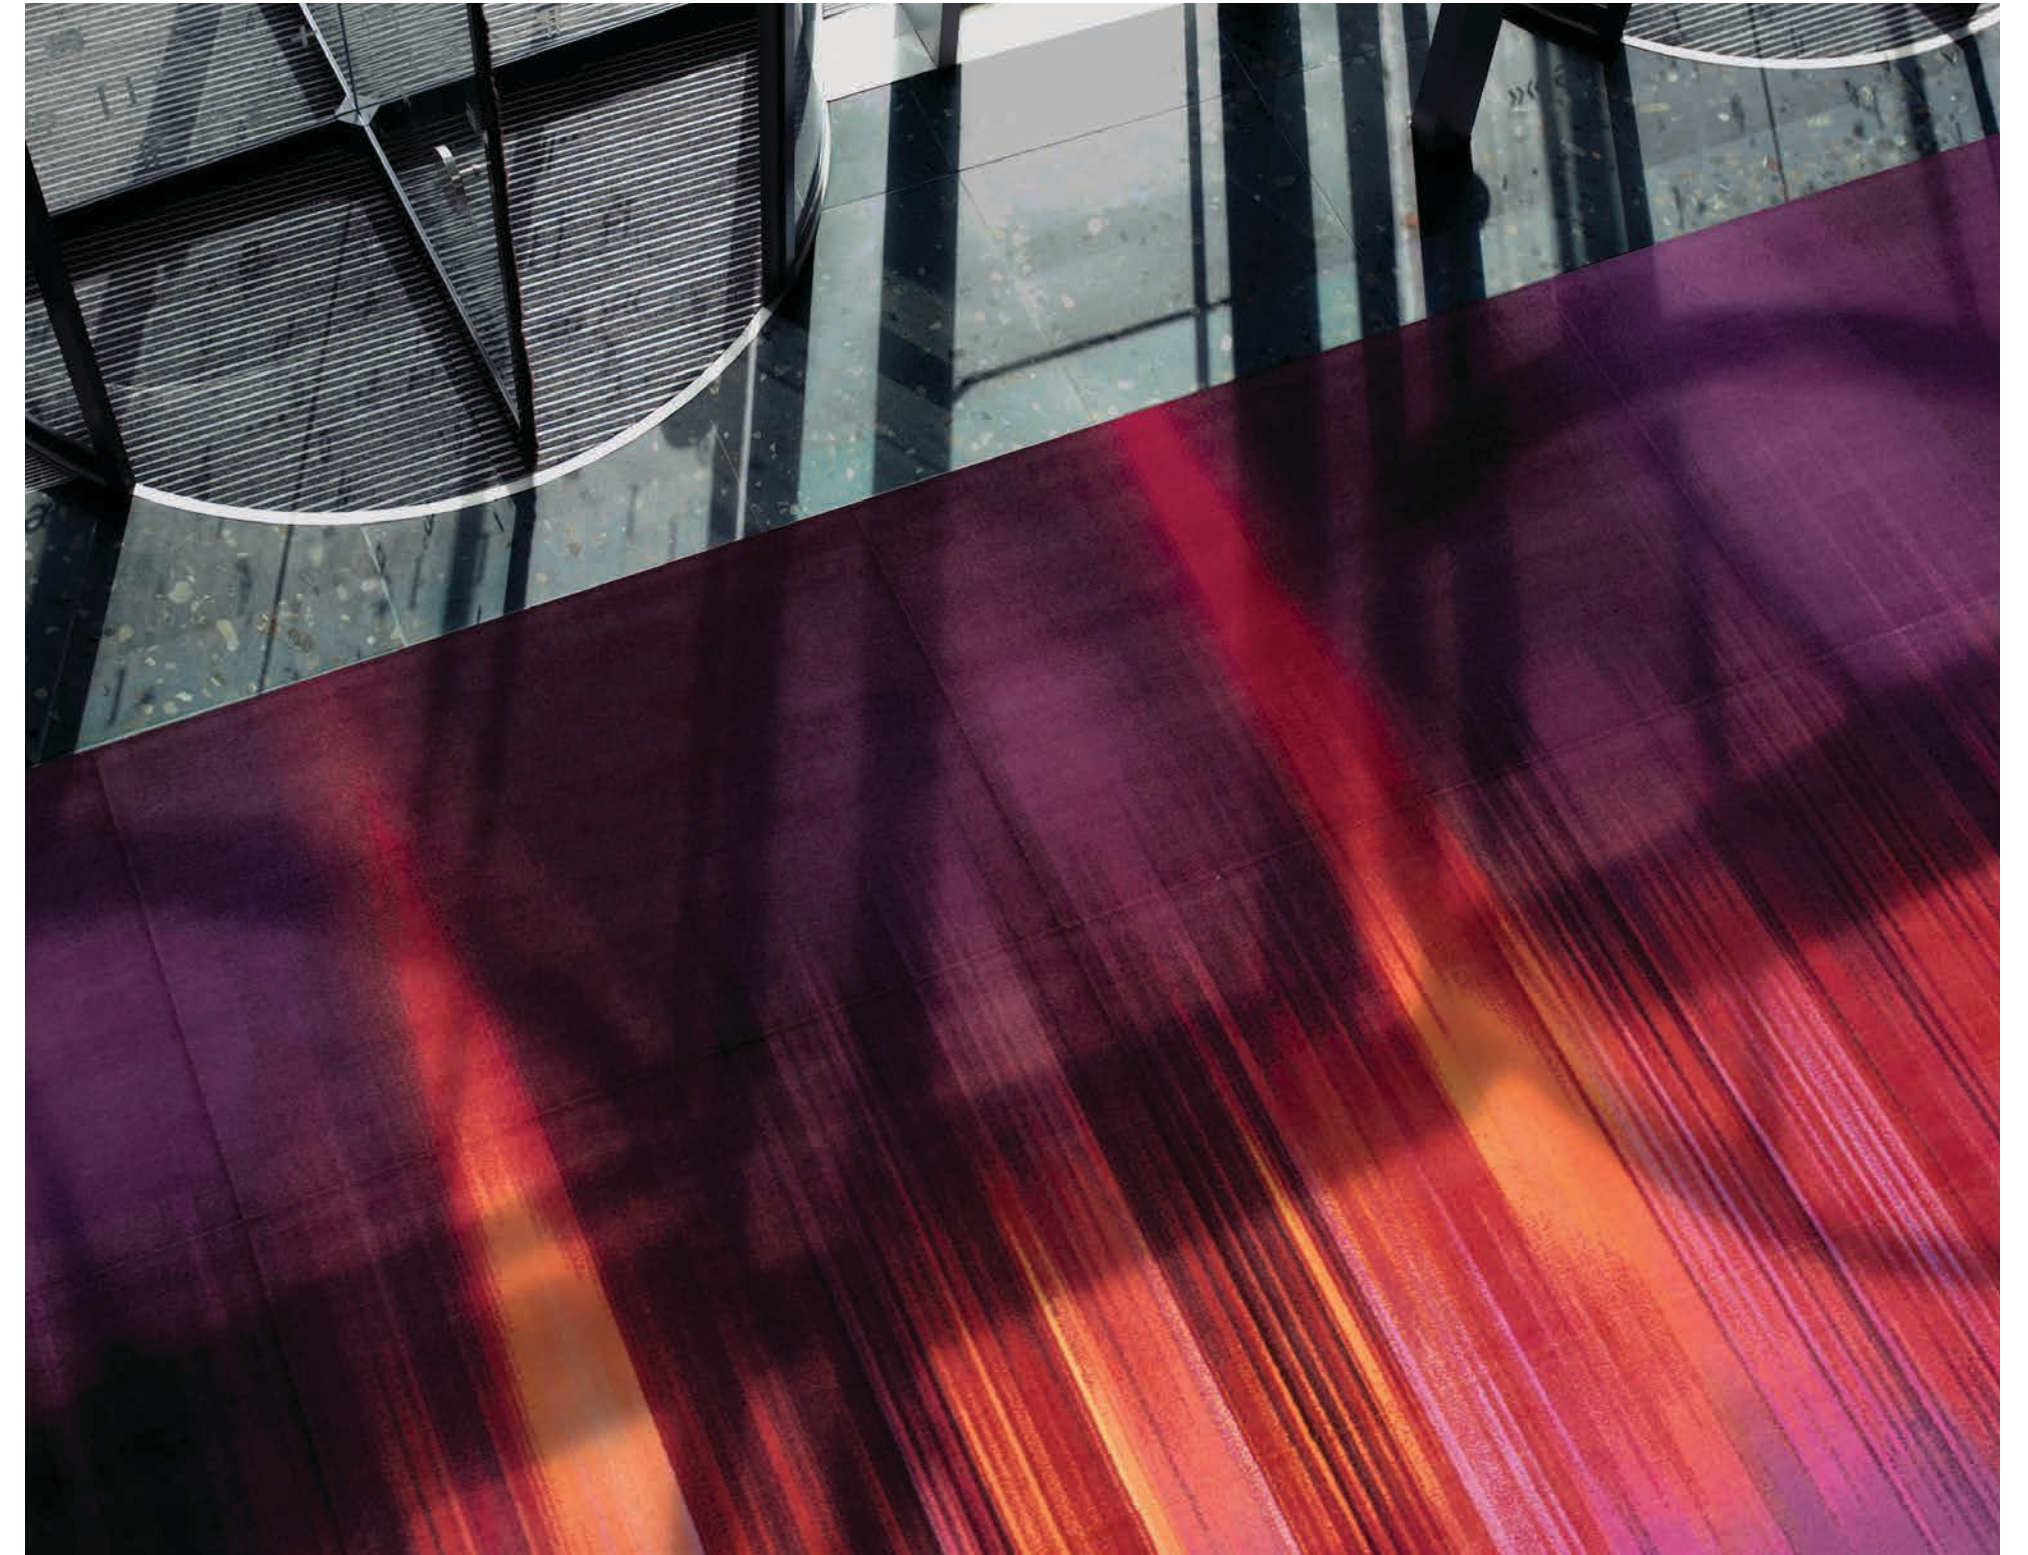

INCODE PROCESS

STEP 1 — Milliken creates an installation map and SKU coding for each custom tile design.

STEP 2 — While each tile is being manufactured, the unique code is dye injected into the carpet face using a temporary, UV sensitive dye.

STEP 3 — Once the code is revealed with a UV light, the installation becomes as simple as 'install by numbers'.

SPECIFICATIONS

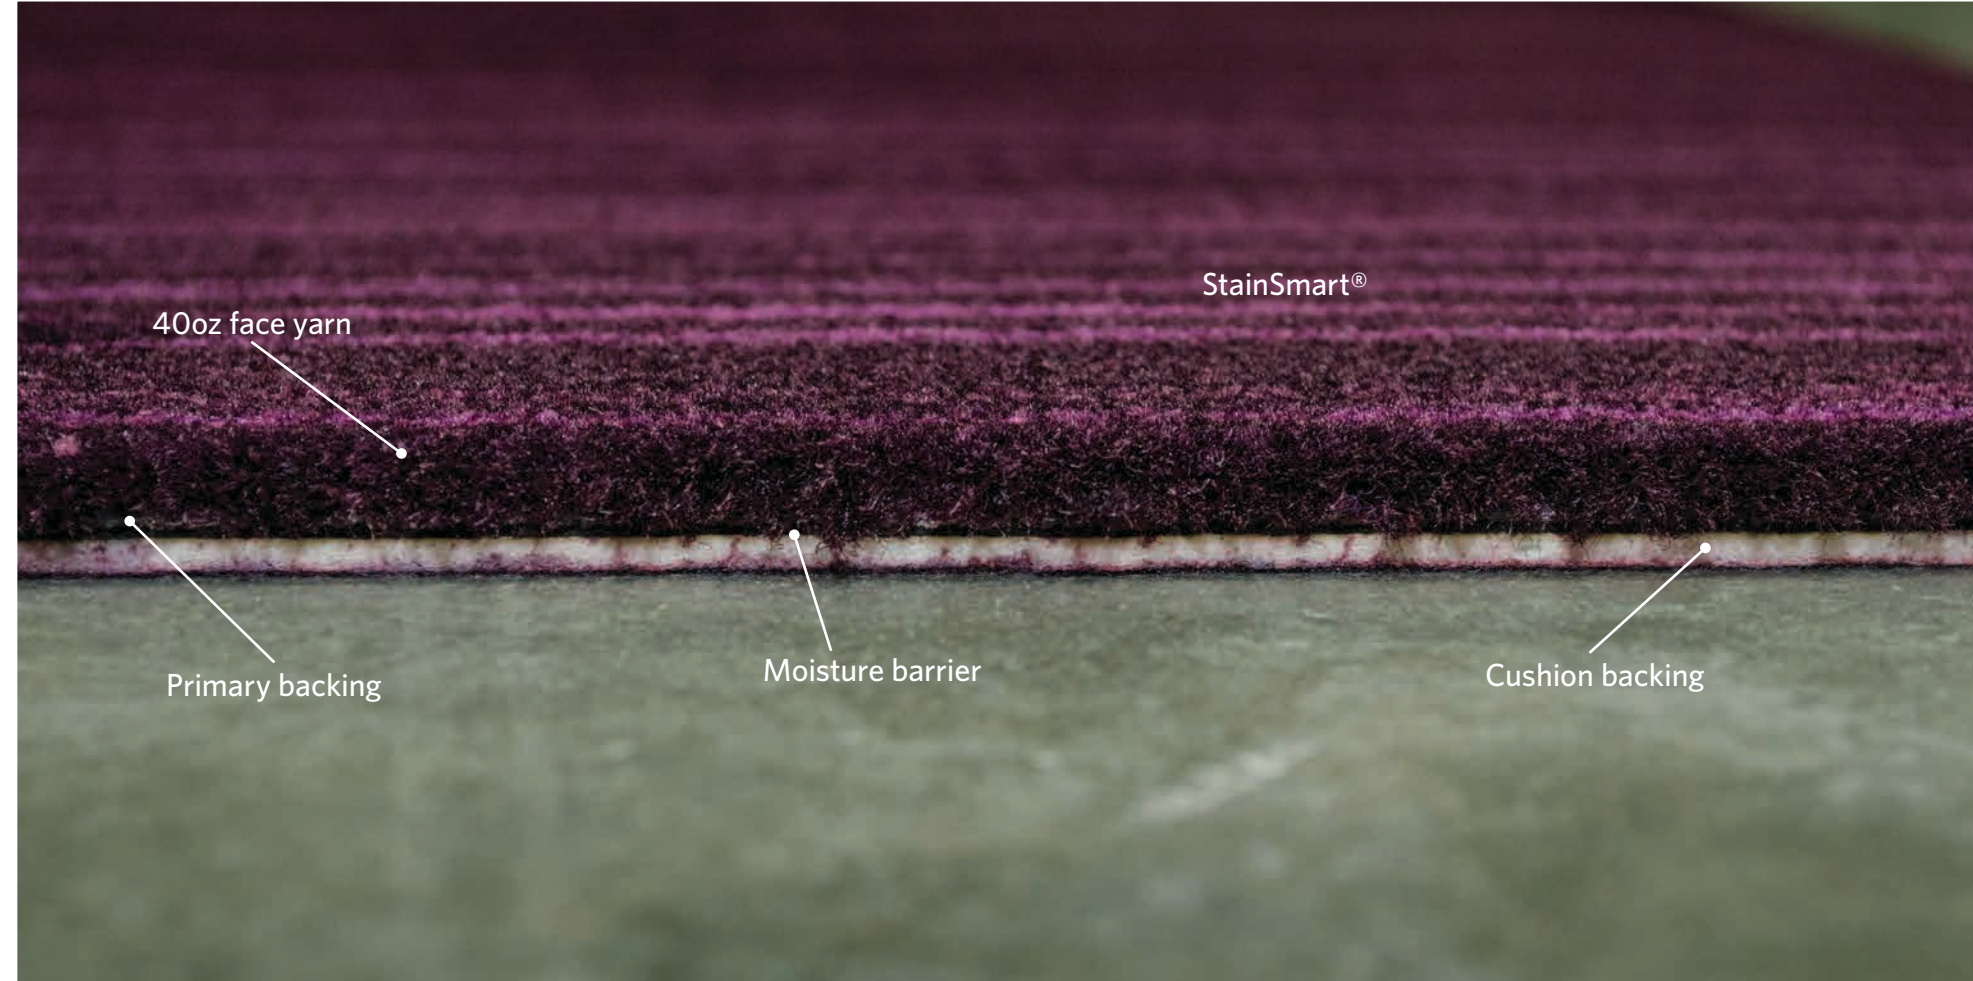

FACE WEIGHT — With carpet tile, some manufacturers quote total weight and some quote face weight. Milliken reveals both. Allume is available in 36oz and 40oz face weight.

BACKING — There are various backing types with different tile options. All Milliken tile comes standard with attached pvc-free polyurethane cushion.

DIMENSIONAL STABILITY — For carpet tile, it is imperative that the tile remain flat and dimensionally stable and secure to the floor under extreme conditions (humidity, temperature, & rolling traction). All Milliken modular carpet products are certified with the Aachen test and pass for dimensional stability.

STAIN AND SOIL PROTECTION — Food and beverage spills in public environments require product performance enhancements to help with long term cleanability and overall appearance. All Milliken carpet products include as standard our StainSmart® technology- a chemically bonded stain and soil resist technology.

MOISTURE BARRIER — For added performance, the product is standard with a barrier layer that prevents moisture from penetrating through the backing.

Grand Plaza® 36

Construction
Tufted, Patterned Cut-Pile Carpet Tile

Dye Method
Digital Millitron® Dye Injection

Tile Size
36" x 36" (914.4 x 914.4 mm.)

Yarn Type
Milliken WearOn® BCF Nylon Type 6,6

Stain Resist / Soil Release
StainSmart®

Tufted Face Weight
36 oz./sq.yd. (1,220.7 g./sq.m.)

Finished Pile Height
0.25 in. sheared (6.4 mm.)

Average Density
5,184

Standard Backing
PVC-Free Comfort Plus® ES
Cushion Secondary with Synthetic
Woven/Non-Woven Composite
Primary

Recommended Installation Methods

MONOLITHIC

Grand Plaza® 40

Construction
Tufted, Patterned Cut-Pile Carpet Tile

Dye Method
Digital Millitron® Dye Injection

Tile Size
36" x 36" (914.4 x 914.4 mm.)

Yarn Type
Milliken WearOn® BCF Nylon Type 6,6

Stain Resist / Soil Release
StainSmart®

Tufted Face Weight
40 oz./sq.yd. (1,356.3 g./sq.m.)

Finished Pile Height
0.25 in. sheared (6.4 mm.)

Average Density
5,879

Standard Backing
PVC-Free Comfort Plus® ES
Cushion Secondary with Synthetic
Woven/Non-Woven Composite
Primary

Recommended Installation Methods

MONOLITHIC

GOLD or Platinum Certified
NSF/ANSI 140 +2007®
